

CDP-35

SERVICE MANUAL

Note: Set changed with preliminary.

*US Model
Canadian Model
AEP Model
UK Model
E Model*

SPECIFICATIONS

System	Compact disc digital audio system
Disc	Compact disc
Laser	Semiconductor laser ($\lambda = 780 \text{ nm}$)
Laser output	Max. 0.4 mW*
	* This output is the value measured at a distance of about 1.6 mm from the objective lens surface on the Optical Pick-up Block.
Spindle speed	200 r.p.m. to 500 r.p.m. (CLV)
Scan velocity	1.2 - 1.4 m/sec. Constant
Error correction	Sony Super Strategy Cross Interleave Reed Solomon Code
Number of channels	2
D-A conversion	16-bit linear
Frequency response	2 Hz - 20 kHz ($\pm_{1.0}^{0.5} \text{ dB}$)
Signal to noise ratio	More than 97 dB
Dynamic range	More than 95 dB
Harmonic distortion	Less than 0.004% (at 1 kHz)
Channel separation	More than 90 dB
Wow and flutter	Below measurable limit
Outputs	Line outputs FIXED (phono jacks) Output level 2 V rms (at MSB) Load impedance over 10 kilohms

ATTENTION AU COMPOSANT AYANT RAPPORT
À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE TRAME ET UNE MARQUE  SUR LES DIAGRAMMES SCHEMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

Disc	
Track pitch	1.6 μm
Sampling frequency	44.1 kHz
Quantization	16 bit linear quantizing/channel
Modulation system	EFM
Transfer rate	2.03 Mbit/sec. (before modulation)

General	
Power requirements	US, Canadian model: 120 V ac 60 Hz AEP model: 220 V ac 50 Hz UK model: 240 V ac 50 Hz E model: 120, 220 or 240 V ac adjustable 50/60 Hz
Power consumption	13 W
Dimensions	Approx. 355 x 80 x 280 mm (w/h/d) (14 x 3 ¹ / ₄ x 11 ¹ / ₈ inches) including projecting parts and controls
Weight	Approx. 3.8 kg (8 lbs 6 oz), net

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY SHADING AND MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

COMPACT DISC PLAYER

SONY

PROTECTION OF EYES FROM LASER BEAM DURING SERVICING

This set employs a laser. Therefore, be sure to follow carefully the instructions below when servicing.

WARNING !!

WHEN SERVICING, DO NOT APPROACH THE LASER EXIT WITH THE EYE TOO CLOSELY. IN CASE IT IS NECESSARY TO CONFIRM LASER BEAM EMISSION, BE SURE TO OBSERVE FROM A DISTANCE OF MORE THAN 30 cm FROM THE SURFACE OF THE OBJECTIVE LENS ON THE OPTICAL PICK-UP BLOCK.

1. Laser Diode Properties

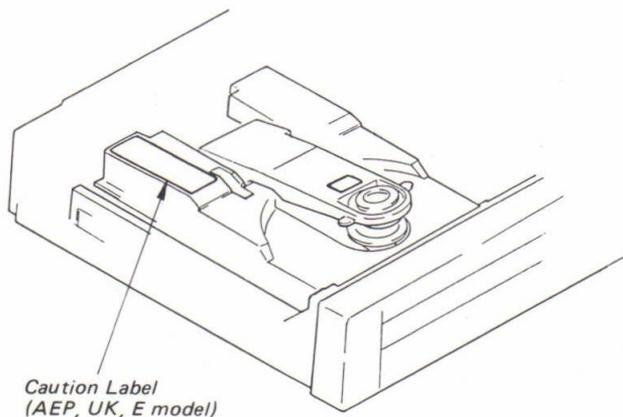

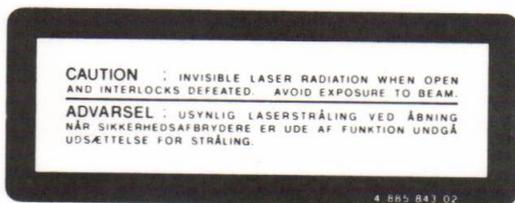

- Material: GaAlAs
- Wavelength: 780 nm
- Emission Duration: continuous
- Laser Output: max. 0.4 mW*

* This output is the value measured at a distance of about 1.6 mm from the objective lens surface on the Optical Pick-up Block.

- Classification: Class Ib

2. During service, do not take the Optical Pick-up Block apart, and do not adjust the APC circuit. If there is a breakdown in the APC circuit (including laser diode), replace the entire Optical Pick-up Block (including APC board).

Caution Label (AEP, UK, E model)

BESKYTTELSE AF ØJNE MOD LASERSTRÅLING UNDER SERVICE

I dette apparat anvendes laserlys. Derfor skal nedenstående instruktioner nøje følges under service.

Følg iøvrigt instruktionerne i servicemanualen.

ADVARSEL!!

Under service må øjnene ikke komme nær objektiv-linsen på den optiske pick-up enhed. I tilfælde af at det er nødvendigt at kontrollere udsendelsen af laserlys, skal det ske i en afstand af mere end 30 cm fra den optiske pick-up.

1. Data for Laser Diode

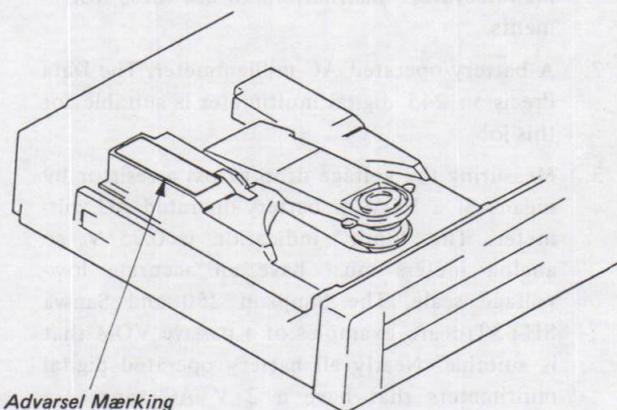

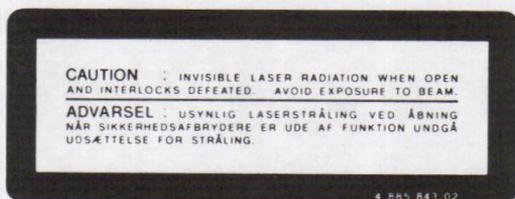

- Materiale: GaAlAs
- Bølgelængde: 780 nm
- Udstråling: Kontinuerlig
- Laser Output: max. 0.4 mW*
 - * målt i 1.6 mm afstand fra overfladen af objektiv-linsen på den optiske pick-up enhed.
- Klassification: Svarende til Klasse Ib

2. Adskil aldrig den optiske pick-up enhed under service, og juster ikke APC kredsløbet (Automatic Power Control). Hvis APC kredsløbet (incl. laser-dioden) bryder ned, skal hele den optiske pick-up enhed (incl. APC printkortet) udskiftes.

LASER ADVARSEL MÆRKNING (AEP model)

Følgende mærkning findes indvendig i apparatet:

1. Advarsel Mærkning

SAFETY CHECK-OUT (US Model)

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microampers). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

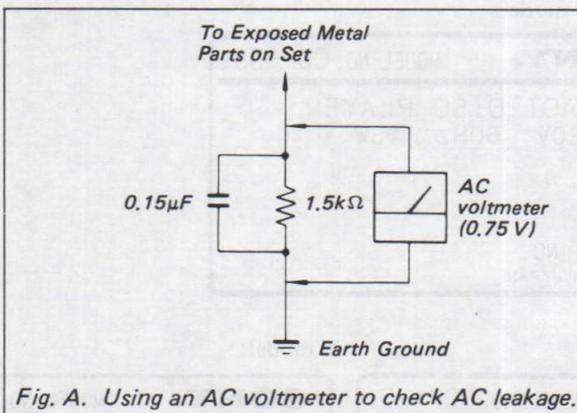

Fig. A. Using an AC voltmeter to check AC leakage.

FEATURES

High performance and high fidelity

With the Sony CDP-35 Compact Disc player, flat frequency response, low wow and flutter, wide dynamic range, minimal distortion and high channel separation are achieved.

Various functions

- The RMS play function for playing the selections in a desired order
- The shuffle play function for playing the selections in a random order
- The index function for the quick location of the part you want
- The auto space function for giving blank space of 3 seconds between each function
- Full repeat function for one selection, a whole disc, RMS play, shuffle play and a particular portion
- Large and easy-to-read music calendar display shows the selection numbers on the disc and the time counter shows the elapsed or remaining playing time.

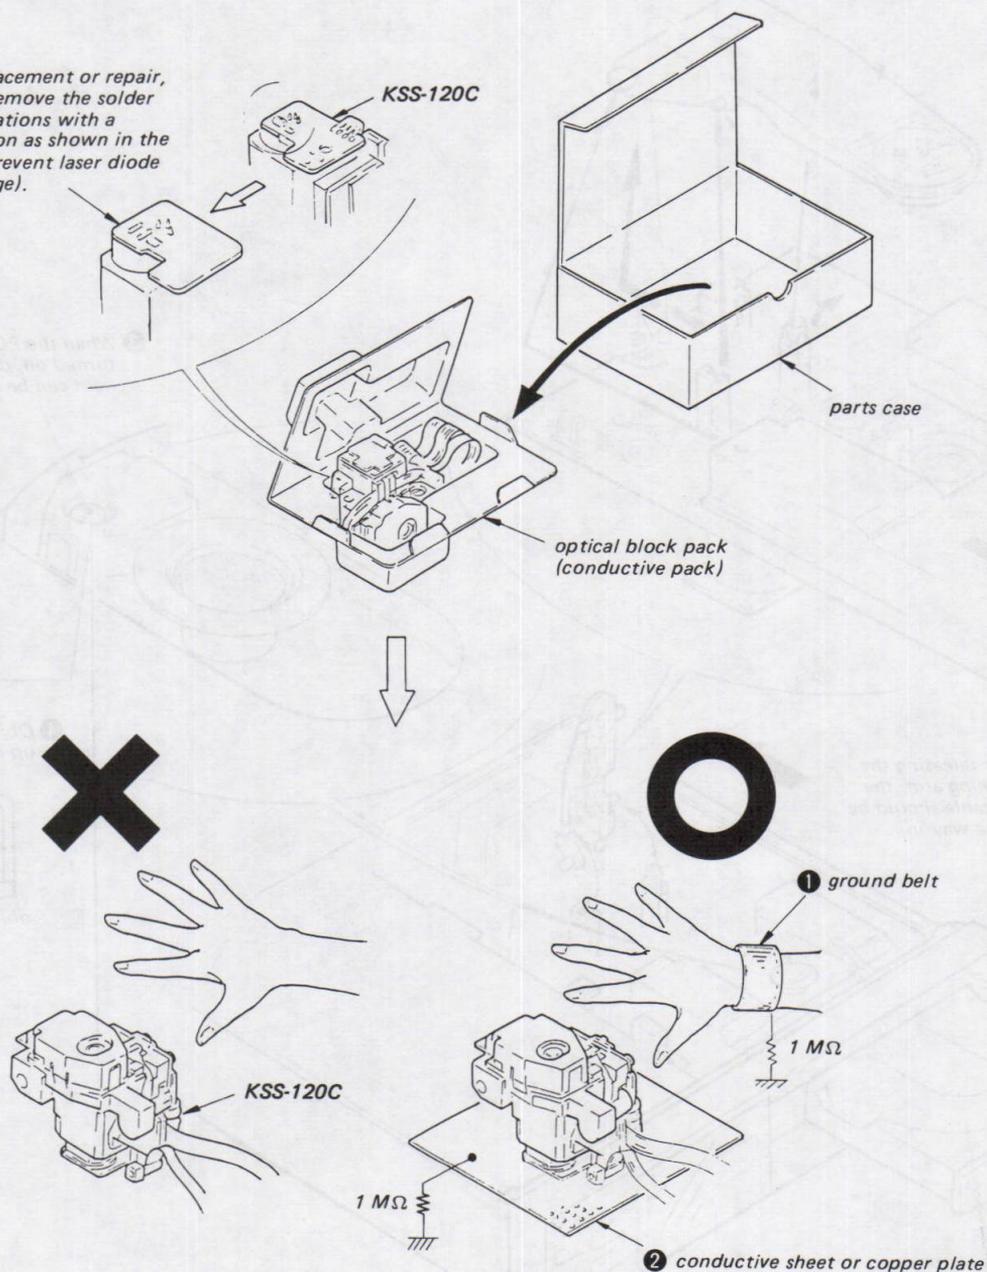

NOTES ON HANDLING THE OPTICAL BLOCK (KSS-120C)

The laser diode inside the optical block may be damaged by static electricity in clothes or the human body.

The following procedures are required when unpacking and repairing KSS-120C in order to avoid static electricity damage.

1. Body grounding
Be sure to wear a ground belt (less than $10^8 \Omega$) in order to release the static electricity stored in the body.
2. Workbench grounding
Place a conductive sheet (less than $10^9 \Omega$) or copper plate on the bench where KSS-120C is to be placed to ground it.
3. Static electricity in the clothing will not be released by the ground belt, so be careful not to let KSS-120C touch clothing.

During replacement or repair, be sure to remove the solder at these locations with a soldering iron as shown in the figure (to prevent laser diode static damage).

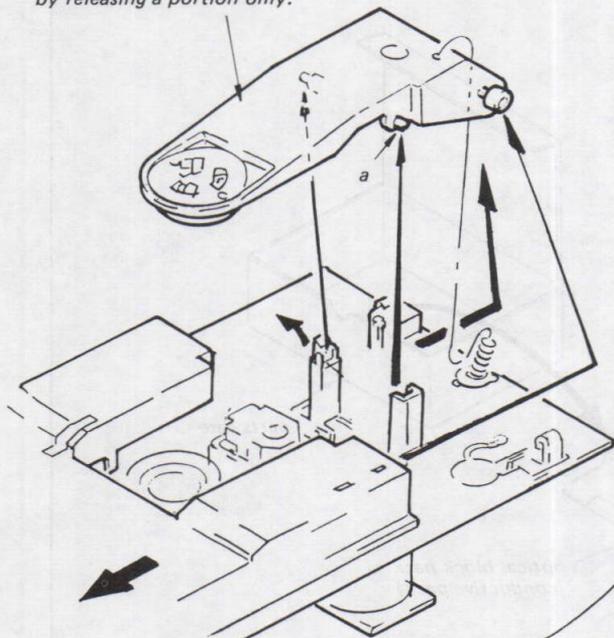

NOTES ON CHECKING LASER DIODE LIGHT EMISSION

The laser beam on this set is converged by the objective lens in the optical block so that it focuses on the disc reflective surface. Therefore, when checking light emission of the laser diode, be sure to keep the eyes more than 30 cm away from the objective lens.

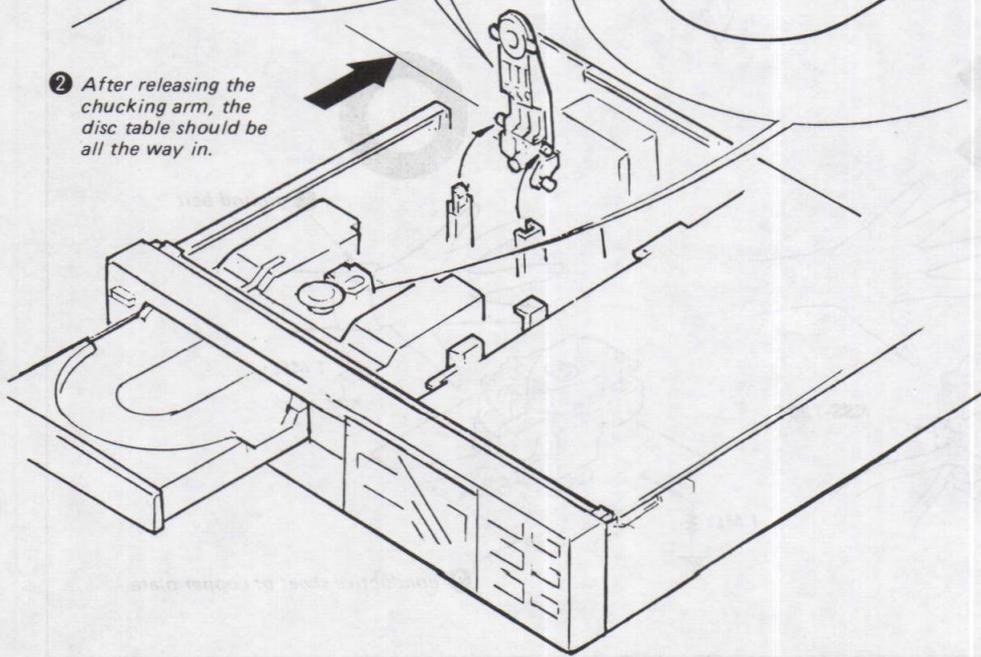

CHECKING LASER DIODE AND FOCUS SEARCH OPERATION

Check if the following operation is performed by looking at the objective lens after releasing the chucking arm and turning the POWER switch on. (Optical block should be at the innermost circumference when checking.)

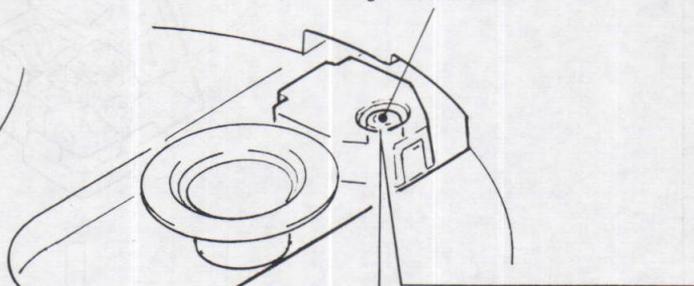

- 1 Release chucking arm. This figure shows the entire chucking arm released, but checking can be done by releasing a portion only.

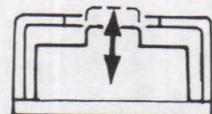

- 2 After releasing the chucking arm, the disc table should be all the way in.

- 3 When the POWER switch is turned on, diffused laser light can be seen.

- 4 Objective lens moves up and down (2 - 3 times)

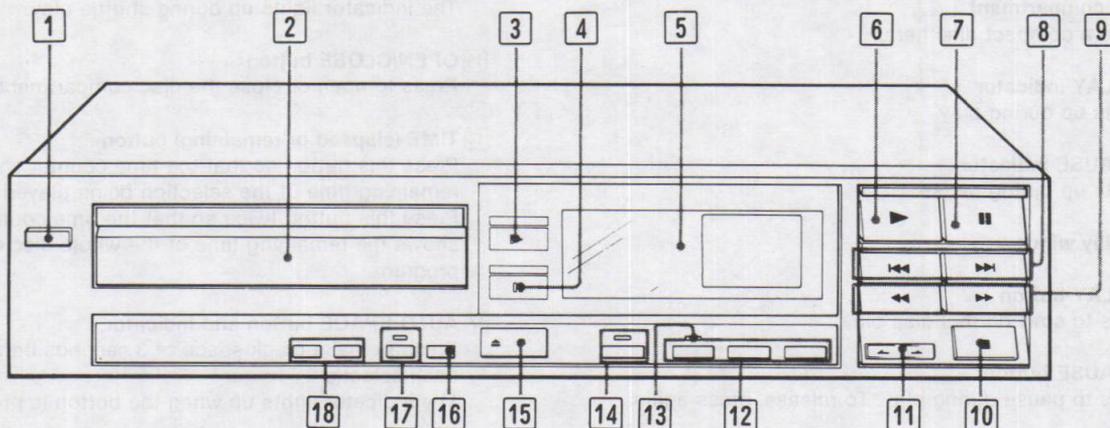

objective lens side view

SECTION 1

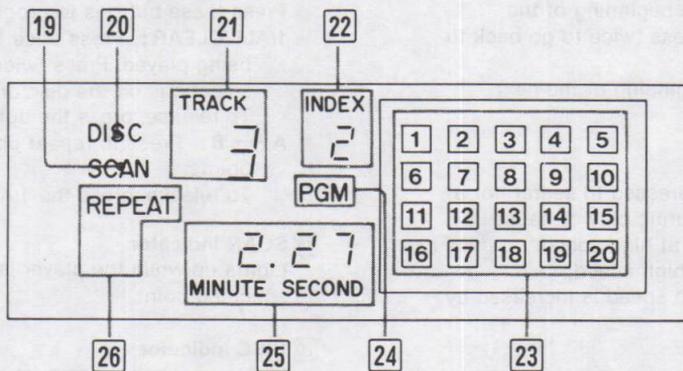

OUTLINE

LOCATION AND FUNCTION OF CONTROLS

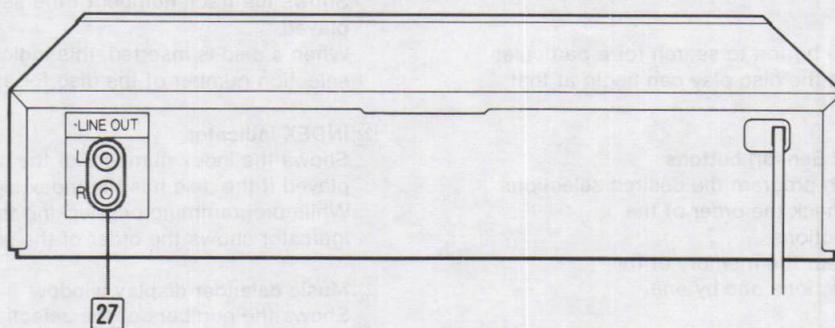

Front panel

Display window

Rear panel

Front panel

- 1 **POWER switch**
- 2 **Disc compartment**
Place a compact disc here.
- 3 **▶ PLAY indicator**
Lights up during play.
- 4 **|| PAUSE indicator**
Lights up during pause.
- 5 **Display window**
- 6 **▶ PLAY button**
Press to start normal disc play.
- 7 **|| PAUSE button**
Press to pause during play. To release, press again.
- 8 **AMS (Automatic Music Sensor) buttons**
◀◀: Press to go back to the beginning of the selection being played. Press twice to go back to the previous selection.
▶▶: Press to skip to the beginning of the next selection.
- 9 **Manual search buttons**
Keep the appropriate button pressed to search for a particular point on the disc during play or pause.
◀◀: Press to go backwards at high speed.
▶▶: Press to go forward at high speed.
In the pause mode, the search speed is increased by 3 times.
- 10 **■ STOP button**
Press to stop the disc play.
The disc will be reset to the very beginning of the first selection, and the player enters the standby mode.
- 11 **INDEX buttons**
Press the appropriate button to search for a particular index number so that the disc play can begin at that point.
- 12 **RMS (Random Music Sensor) buttons**
PROGRAM: Press to program the desired selections.
CHECK: Press to check the order of the programmed selections.
CLEAR: Press to clear the memory of the programmed selections one by one.
- 13 **Program indicator**
Lights up during programming of the selections and RMS play.
- 14 **SHUFFLE button and indicator**
Press to start shuffle play. To release, press again.
The indicator lights up during shuffle play.
- 15 **OPEN/CLOSE button**
Press to open or close the disc compartment.
- 16 **TIME (elapsed or remaining) button**
Press this button so that the time counter shows the remaining time of the selection being played.
Press this button twice so that the time counter shows the remaining time of the whole disc or program.
- 17 **AUTO SPACE button and indicator**
Press to make blank space of 3 seconds between each selection.
The indicator lights up when the button is pressed.
- 18 **REPEAT buttons**
Press these buttons to program repeat play.
1/ALL/CLEAR: Press once to repeat the selection being played. Press twice to repeat all the selections on the disc or program.
To release, press the button three times in total.
A ↔ B: Press to repeat play between two particular points.
To release, press the 1/ALL/CLEAR button.
- 19 **SCAN indicator**
Lights up while the player is searching for the specified point.
- 20 **DISC indicator**
Lights up when a compact disc is inside or when the disc compartment is opened.
- 21 **TRACK indicator**
Shows the track number of the selection being played.
When a disc is inserted, this indicator shows the total selection number of the disc for a while.
- 22 **INDEX indicator**
Shows the index numbers of the selection being played if the disc has the index signals recorded.
While programming or checking the selections, this indicator shows the order of the selections.
- 23 **Music calendar display window**
Shows the numbers of the selections (up to 20) on the inserted disc.
- 24 **PGM indicator**
Lights up when the PROGRAM button is pressed.
This indicator disappears as soon as the RMS play begins.

25 Time counter
Shows the elapsed playing time of the selection being played in minutes and seconds. When the disc is inserted, this indicator shows the total playing time of the disc for a while.

26 REPEAT indicator
1: Lights up during repeat play of a selection.
ALL: Lights up during repeat play of the whole disc, RMS play or shuffle play.
A ↔ B: Lights up during A ↔ B repeat play.

Rear panel

27 LINE OUT jacks
Connect to the CD or auxiliary input jacks of the amplifier.

DISC OPERATION

TO PLAY

- 1 Turn on the amplifier and set the front selector for the CD player position.
- 2 Choose the POWER button (ON).
- 3 Press the OPEN/CLOSE button to load the disc.
- 4 Put the disc in the disc compartment with the label side up.
- 5 Press the PLAY button. The operation starts and play begins from the beginning of the disc.

The number of the selection on the disc and the total time of all the selections are displayed for a few seconds on the display window when the disc is loaded.

The window that shows the track number, elapsed time, and the number of selections of recording on the disc is displayed.

If you press the PAUSE button when the operation is done, the operation will stop and the display shows the beginning of the next selection.

When the display shows the end of the last selection, the disc is automatically sent to the beginning of the disc and starts the TRACK (reproduction) operation.

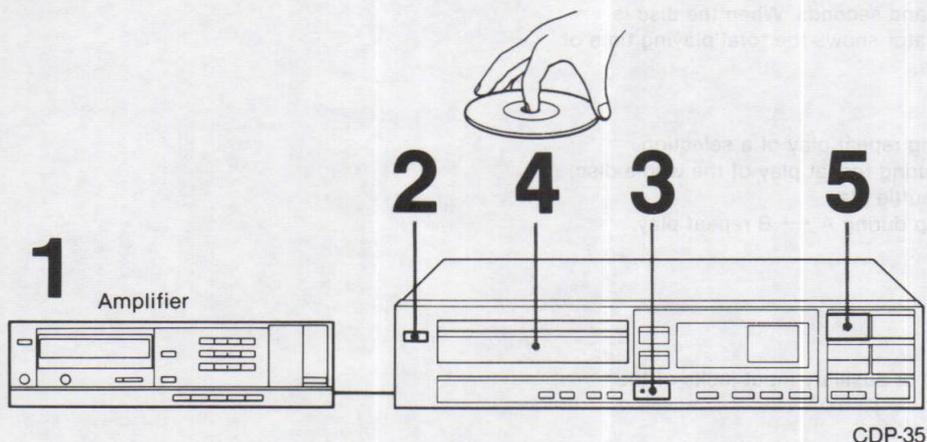

TO STOP DURING PLAY

An important point to remember in the CD system is when the disc is loaded in the front of the conventional stereo system and the disc is not loaded in the front of the CD player, the disc is not loaded in the front of the CD player. In addition, the disc level is very low if you turn up the volume excessively when listening to the CD player when the disc level is very low. If the disc is loaded, the tracks may be damaged when the disc is loaded with the disc is played.

To pause for a moment during play, press the PAUSE button. The display will indicate "PAUSE" and the disc will stop rotating and the compartment will open.

To return to the beginning of the disc selection, press the STOP button. The display will indicate "STOP" and the disc will stop rotating and the compartment will open.

BASIC OPERATION
DISC PLAYING

TO PLAY

- 1** Turn on the amplifier and set the input selector to the CD player position.
- 2** Depress the POWER switch (⏻ ON).
- 3** Press the OPEN/CLOSE button. The disc compartment opens.
- 4** Put the disc in the disc compartment **with the label surface up**.
- 5** Press the ▶ PLAY button. The compartment closes and play begins from the beginning of the disc.

The number of the selections on the disc and the total time of all the selections are displayed for a few seconds on the display window when the disc is inserted.
The number indicators light up on the music calendar display window to show the number of selections on the disc.

If you press the || PAUSE button when the compartment is open, the compartment will close and the disc will pause at the beginning of the first selection.

When the player reaches the end of the last selection of the disc, it is automatically reset to the beginning of the disc and stands by. TRACK indicator displays 0.

An important point to remember
In the CD system, a wider dynamic range is achieved than that of the conventional analog system, and the peaks of high level inputs are recorded with high-fidelity. In addition, the noise level is very low. If you turn up the volume inadvertently while listening to a portion where no audio signals or very low level inputs are recorded, the speakers may be damaged when the portion with peak levels is played.

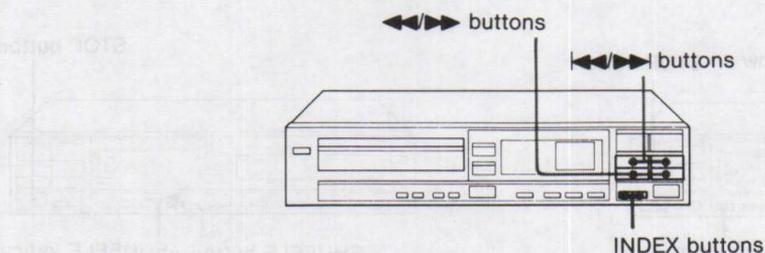

TO STOP DURING PLAY

To open the compartment
Press the OPEN/CLOSE button.
The disc will stop rotating and the compartment will open.

To pause for a moment during play
Press the || PAUSE button.
The || indicator will illuminate. To release pause and restart play from the same point, press the || PAUSE button again.

To reset to the beginning of the first selection
Press the STOP button.
The player will stand by.

SEARCH OPERATION

TO SEARCH FOR A PARTICULAR SELECTION -AMS-(Automatic Music Sensor)

Using the ◀◀ or ▶▶ button, you can quickly locate a desired selection ahead or back. When the button is pressed, the player searches the selection data recorded at the beginning of each selection and play will start from the beginning of the selection.

To search for the beginning of the selection

Press the ◀◀ button **once** during play or pause mode. The beginning of the selection being played is searched for.

To search for a previous selection, keep the ◀◀ button pressed.

If you press the ◀◀ button after the first selection is located, the TRACK indicator will not change.

To search for a selection ahead

Press the ▶▶ button **once** during play or pause mode. The beginning of the next selection is searched for.

To search for the further ahead selection, keep the ▶▶ button pressed.

If you press the ▶▶ button after the last selection is located, the TRACK indicator will not change.

TO START PLAYING FROM A PARTICULAR SECTION (INDEX SEARCH)

On some discs, the index numbers divide the selections into sections, such as chapters in a book or movements in a symphony.

To start playback from a particular section, press the INDEX buttons during playback or in the pause mode. The selected index number is displayed in the INDEX indicator.

Note: With discs without index numbers, this function cannot be activated.

TO SEARCH FOR A PARTICULAR POINT IN A SELECTION (MANUAL SEARCH)

Using the manual search buttons, you can locate a particular point of a selection during play or pause.

To go back at a high speed, keep the ◀◀ button depressed.

To advance at a high speed, keep the ▶▶ button depressed.

In the pause mode, the search speed is increased by three times.

What are these indications?

This indication appears if you continuously press the ▶▶ button at the end of the disc.

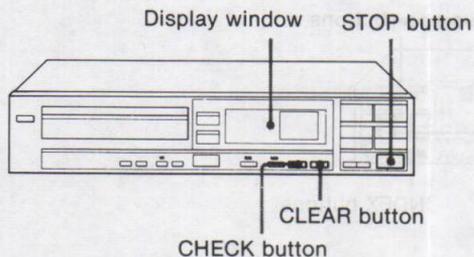

To go back to TRACK indication, press the ◀◀ button.

This indication appears if you continuously press the ◀◀ button at the very beginning of the disc.

TO PLAY THE SELECTIONS IN A RANDOM ORDER (SHUFFLE PLAY)

TO CHECK THE PROGRAMMED SELECTIONS

Press the CHECK button.
The programmed selections and their order can be checked.
With each press, the selection number, its order and its playing time will be displayed in the display window. After all programmed selections are displayed, the original display appears after a few seconds.

Notes

- When selections after the 20th are being checked, the track number and program order number are displayed, but there is no display in the music calendar.
- The CHECK button also works during play.

TO CLEAR THE PROGRAMMED SELECTIONS

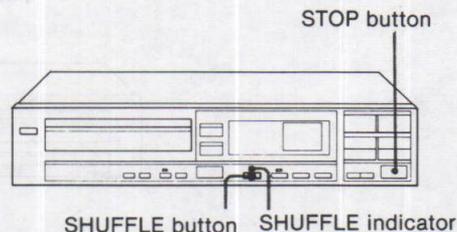

Use the CLEAR and CHECK buttons to erase programmed selections.

During programming

Press the CLEAR button.
With each press, the selections will be cleared in the order from the last selection programmed.
To clear all of the programmed selections, press the STOP button.

During play

- 1 Press the CHECK button until the selection to be cleared is displayed.
 - 2 Press the CLEAR button.
- This function can be also activated **during** programming.

Press the SHUFFLE button
The SHUFFLE indicator lights up.
To go back to normal disc playing, press the SHUFFLE button again. To stop the disc play, press the STOP button.

Play begins from any selection on the disc. Each selection is played once, in a random order. There is a blank of 3 seconds between each selection.

To skip to the next selection, press the ►► button.

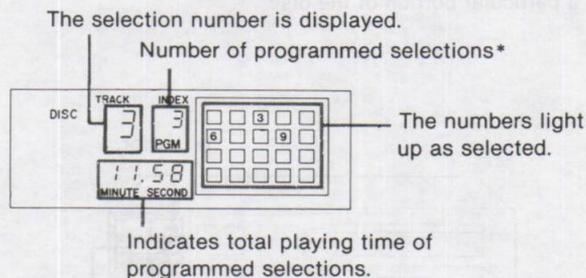

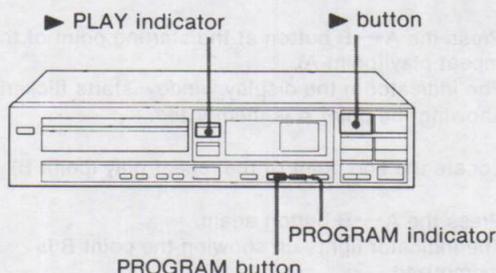

To return to the beginning of the selection being played, press the ◀◀ button.

To go forward to any point, press the ►► button. You cannot return to a previous selection.

- Shuffle play does not operate if the disc compartment is open.
- On discs with more than 20 selections, all selections will be shuffle played although the music calendar display window shows only the selection number up to 20.

ADVANCED OPERATION**TO PLAY THE SELECTIONS IN A DESIRED ORDER (RMS)**

Any number of selections up to 20 can be selected and played in any order by using the PROGRAM button.

- 1 Choose the selection to be programmed with ◀◀ or ▶▶ button in standby mode.
- 2 Press the PROGRAM button. The ► PLAY indicator starts flickering.
- 3 Repeat the steps 1 and 2 for other selections to be programmed.
- 4 Press ► PLAY button.

When program play begins, the PGM indication goes out. The INDEX indicator which displays the number of programmed selection (* in the illustration) returns to the first index number.

When a selection ends, its number disappears from the music calendar and the selection is also erased from the program memory. After 3 seconds the next programmed selection begins.

To skip to the next selection, use the ▶▶ button. (See page 9). You cannot return to the previous selection.

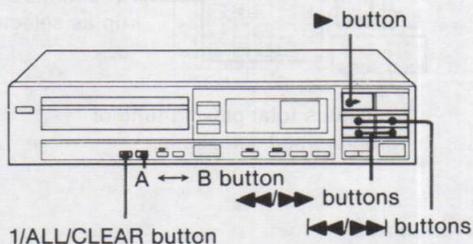

After all programmed selections are played, the player returns to the standby mode.

For a disc with more than 20 selections, only the selection numbers up to 20 will be shown in the music calendar display window.

You can program even without the disc inserted. Program with the disc compartment open. After programming place the disc in the compartment and press the ►PLAY button to begin play. The total playing time is calculated and displayed after the disc is inserted.

REPEAT PLAY

Using the REPEAT buttons, you can repeat the selection being played, the whole disc, RMS play, shuffle play, and a particular portion of the disc.

TO REPEAT ONLY THE SELECTION BEING PLAYED

Press the 1/ALL/CLEAR button once during play or standby mode.
The REPEAT indicator shows "1".
To release, press the 1/ALL/CLEAR button twice.

TO REPEAT THE WHOLE DISC

Press the 1/ALL/CLEAR button twice during play or standby mode.
The REPEAT indicator shows "ALL".
To release, press the 1/ALL/CLEAR button again.

TO REPEAT RMS PLAY OR SHUFFLE PLAY

Press 1/ALL/CLEAR button once during RMS play or shuffle play or in standby mode.
The REPEAT indicator shows "ALL".
To release, press the 1/ALL/CLEAR button again.
During RMS play or shuffle play, repeat play of a single selection cannot be activated.

When the ▶▶▶▶ or ▶▶▶▶ button is kept pressed during repeat play until the end of the disc or the program, the display window shows "-0.03", and repeat play resumes after 3 seconds.

TO PLAY BETWEEN TWO PARTICULAR POINTS REPEATEDLY(A↔B REPEAT)

- 1 Press the A↔B button at the starting point of the repeat play (point A).
The indicator in the display window starts flickering showing the point A is memorized.
- 2 Locate the end point of the repeat play (point B).
- 3 Press the A↔B button again.
The indicator lights up showing the point B is memorized.

The disc will go back to point A, and the repeat play starts. To release, press the 1/ALL/CLEAR button.

Note: During RMS play or shuffle play, A↔B repeat play cannot be activated, when A↔B points are in different selections.

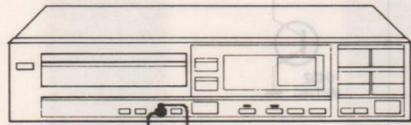

MORE ABOUT A ↔ B REPEAT FUNCTION

To play from a desired point (memory play)

- 1 At the point from which you wish to listen later (point A), press the A↔B button.
- 2 When you press the ▶PLAY button, the disc will go back to the point A and play will restart.
To cancel the point A, press the 1/ALL/CLEAR button.

AUTO SPACE FUNCTION

Using the auto space function, blank space of approximately 3 seconds can be inserted between each selection.

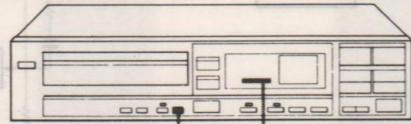

AUTO SPACE button AUTO SPACE indicator

To activate the auto space function
Press the AUTO SPACE button.
This button can be activated in any mode.

To cancel the auto space function
Press the AUTO SPACE button again.

USING THE TIME COUNTER

TIME button Time counter display

Generally, the time counter shows the elapsed playing time from the beginning of a selection in minutes and seconds.
If the selection has a blank space at its beginning, the counter is reset to the time preceded by the minus sign such as "-0.02", "-0.01", etc.

TO MONITOR THE REMAINING PLAYING TIME

To monitor the remaining time of the selection being played
Press the TIME button once.
To release, press the TIME button twice.

The remaining time of the selection being played

To monitor the remaining play time of the whole disc or program
Press the TIME button twice.
To release, press the TIME button again.

The selection number disappears.

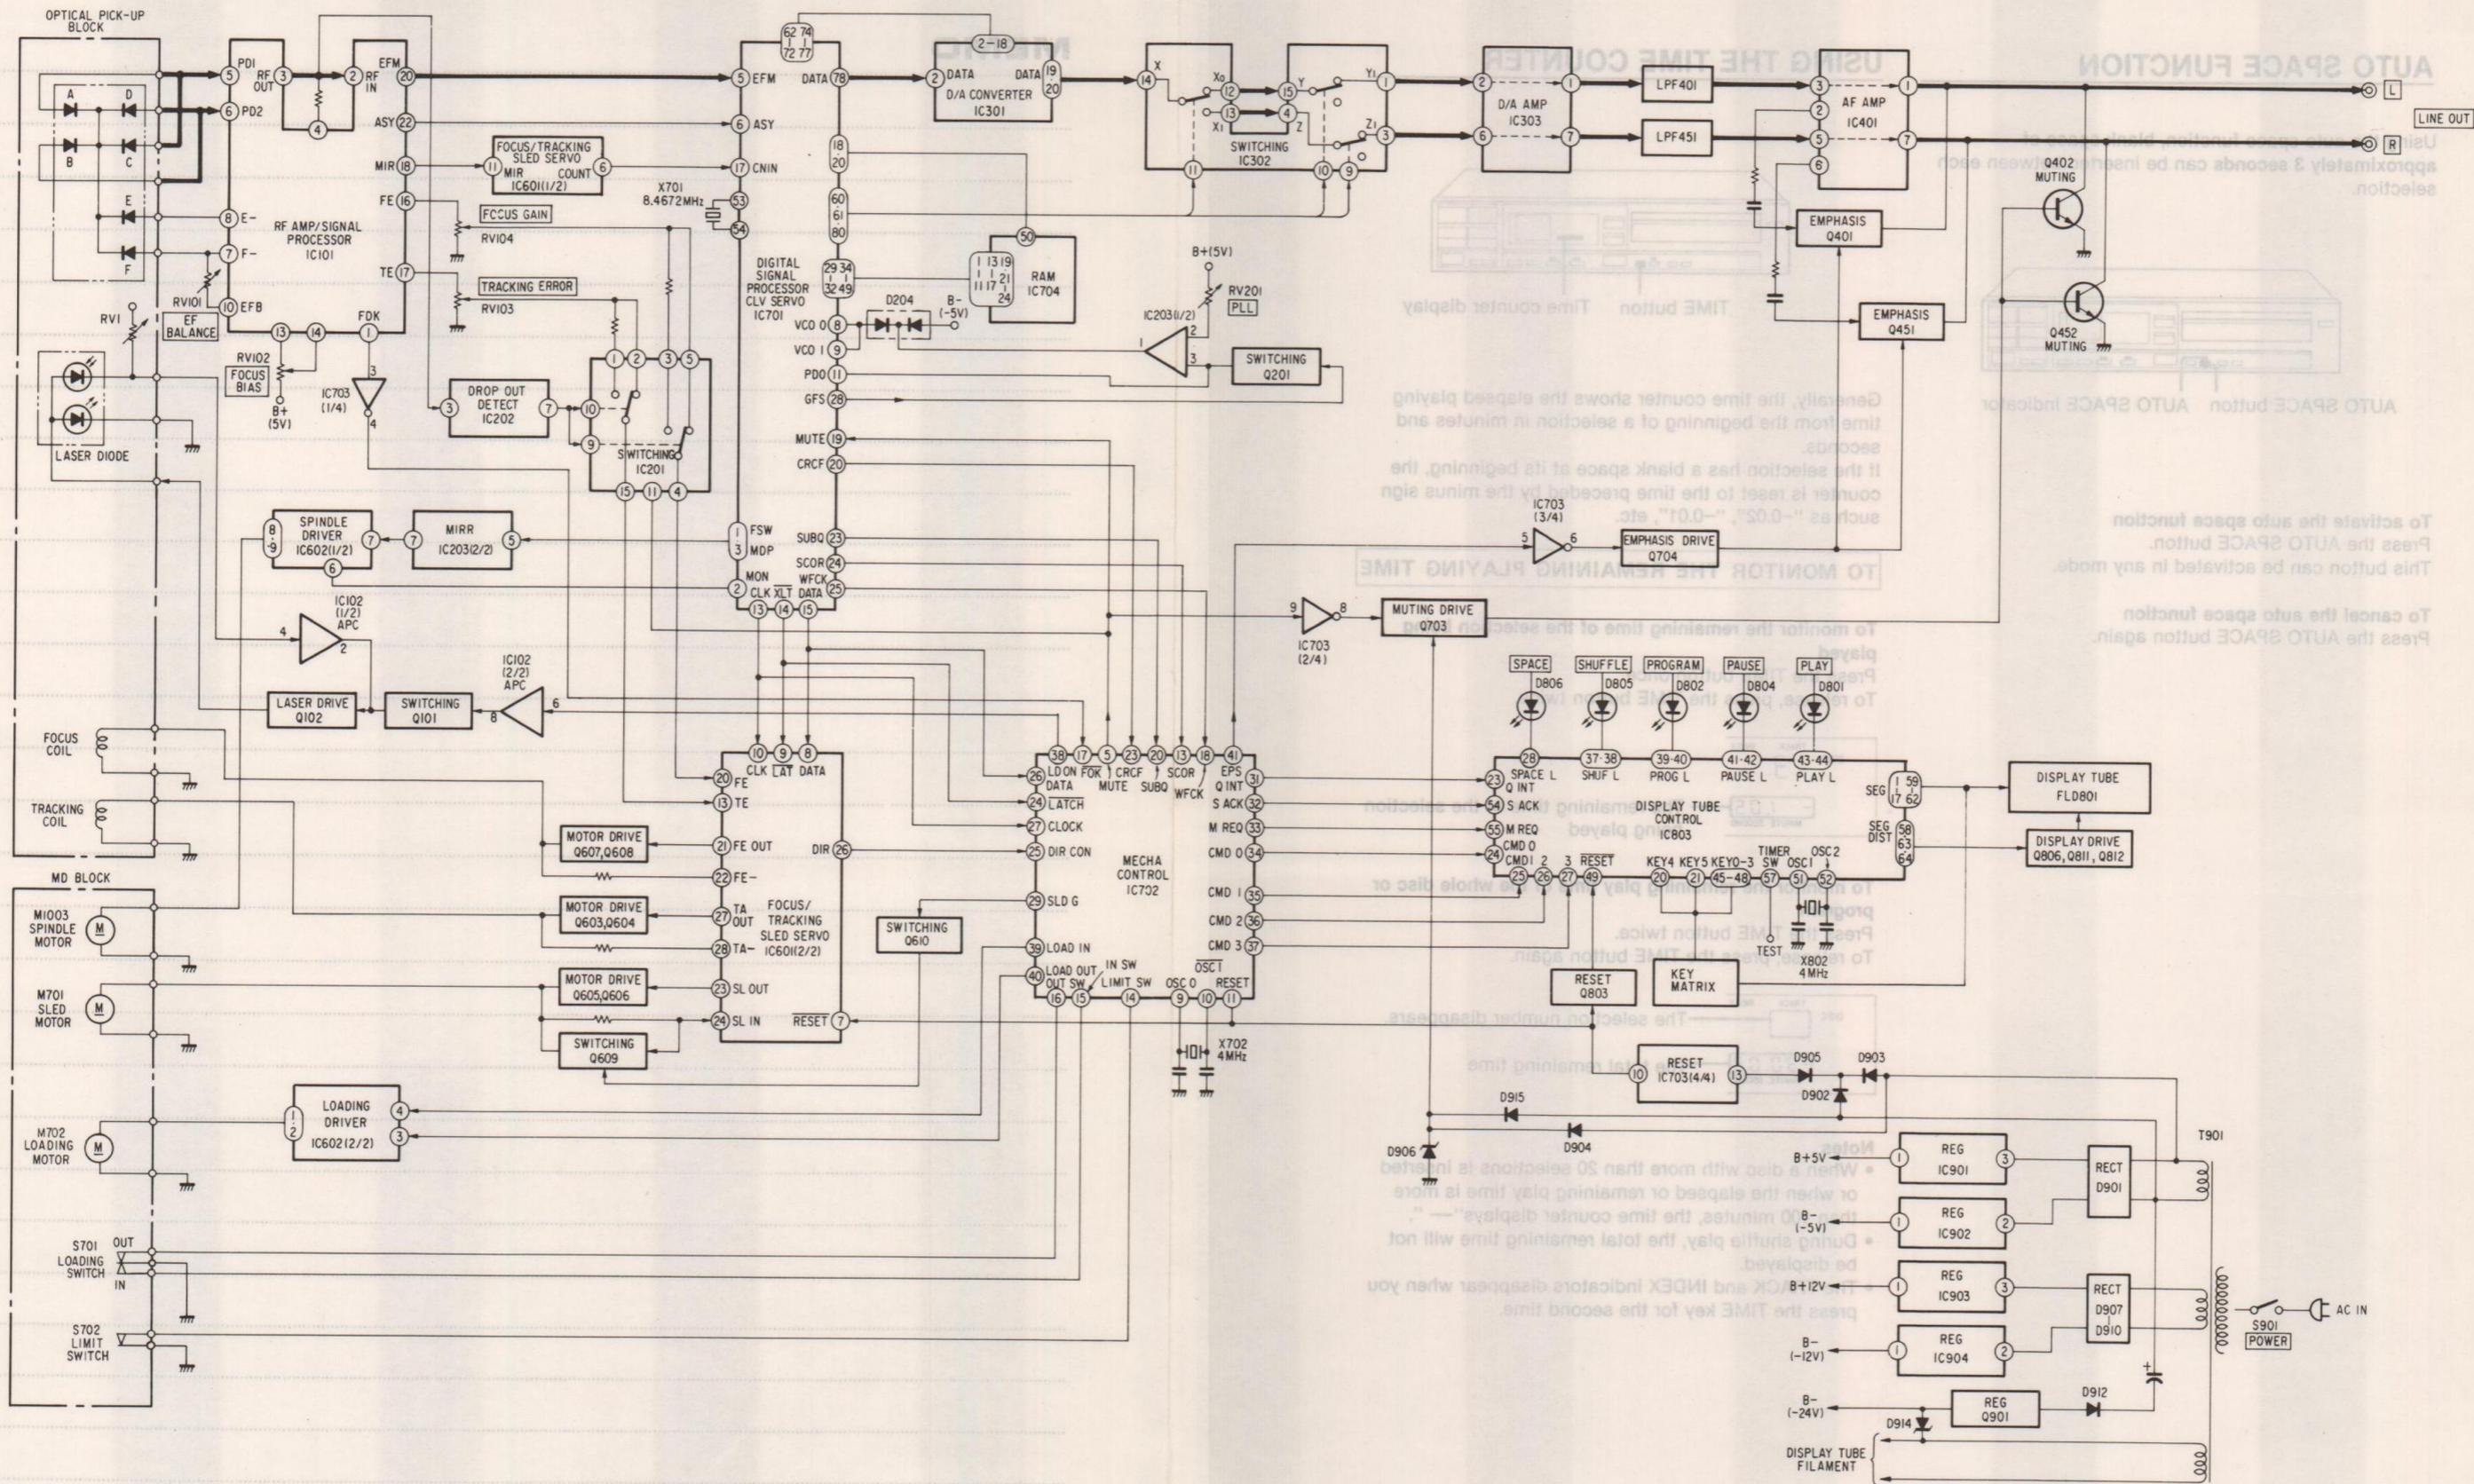

The total remaining time

Notes

- When a disc with more than 20 selections is inserted or when the elapsed or remaining play time is more than 100 minutes, the time counter displays "—".
- During shuffle play, the total remaining time will not be displayed.
- The TRACK and INDEX indicators disappear when you press the TIME key for the second time.

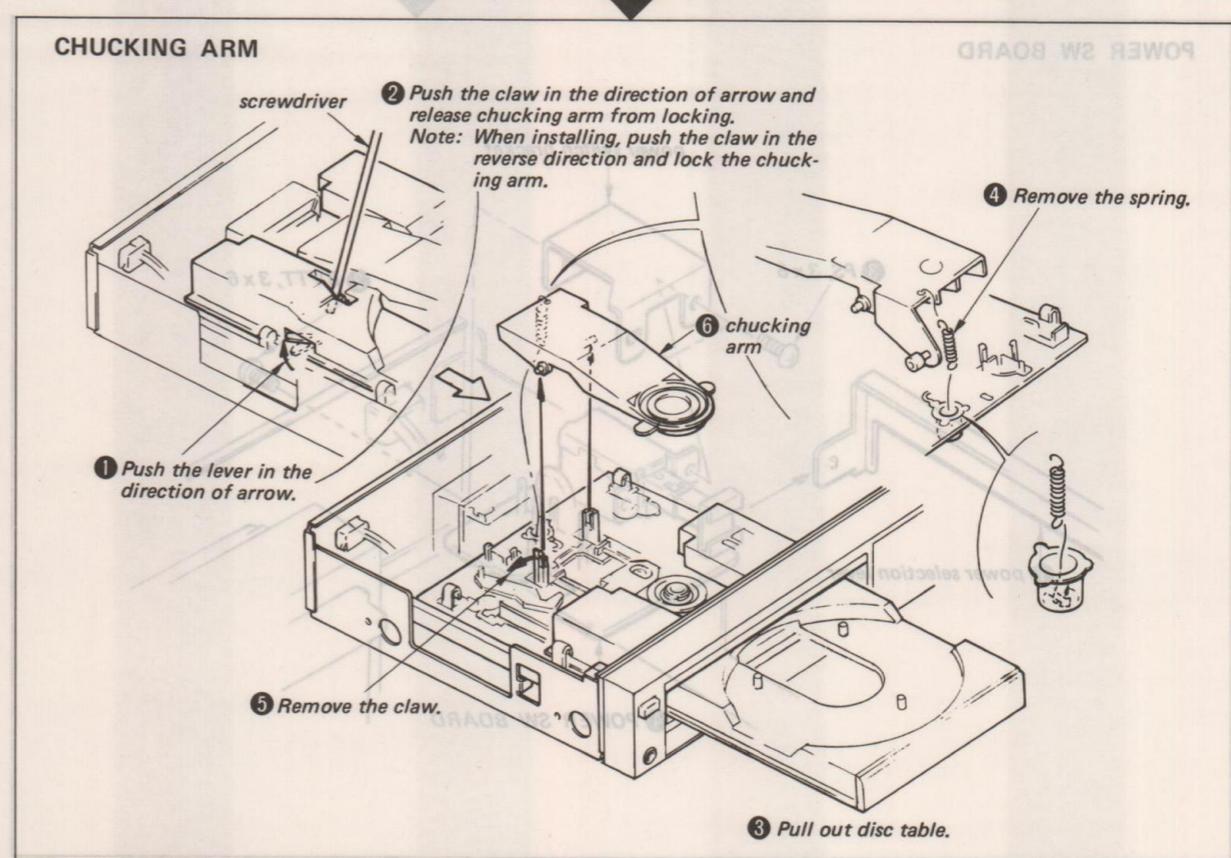

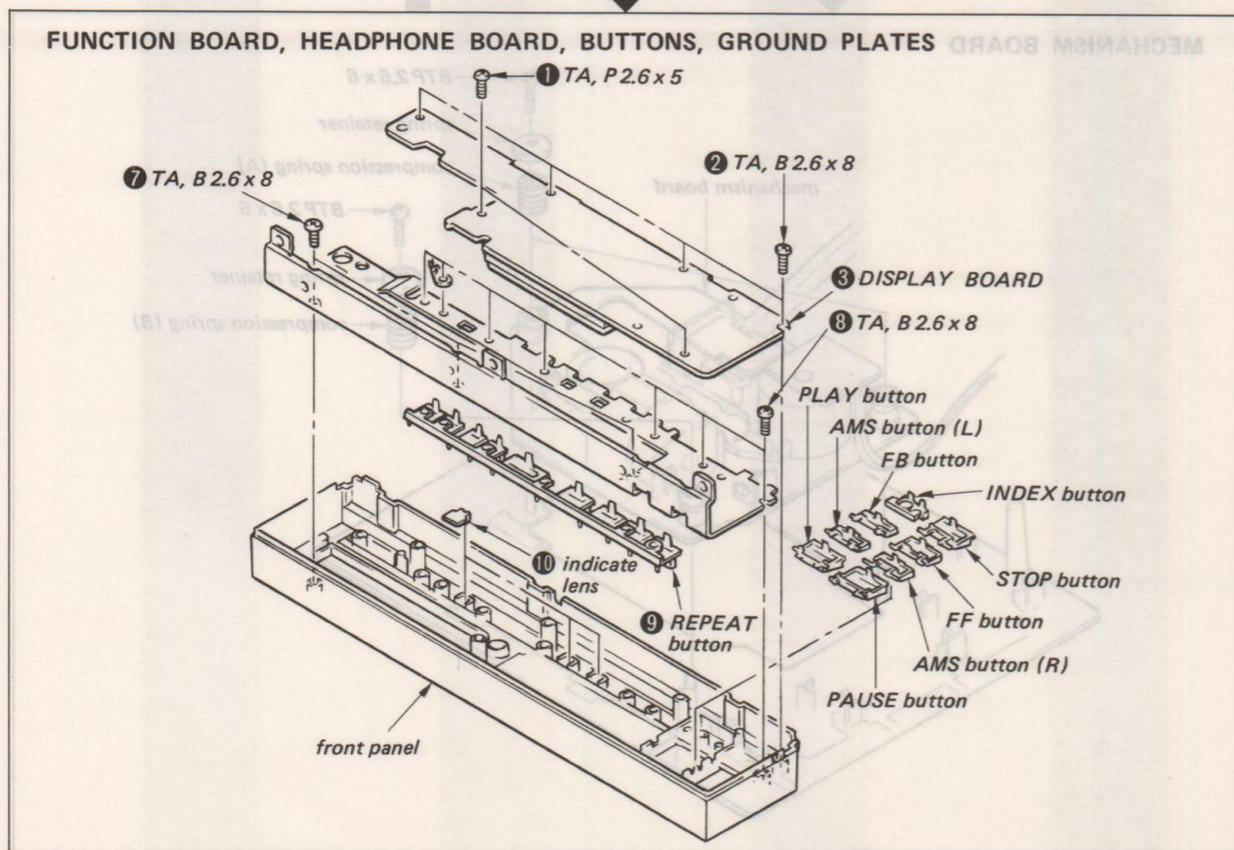

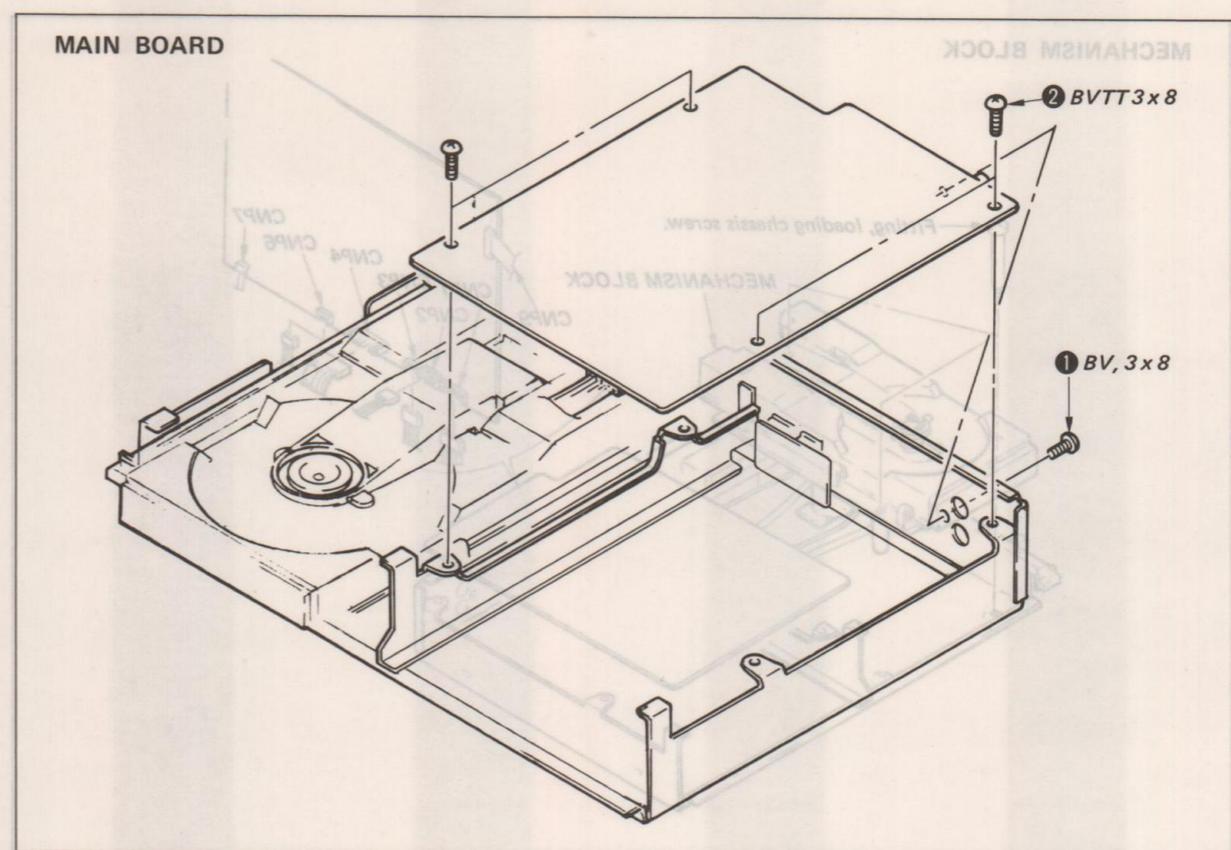

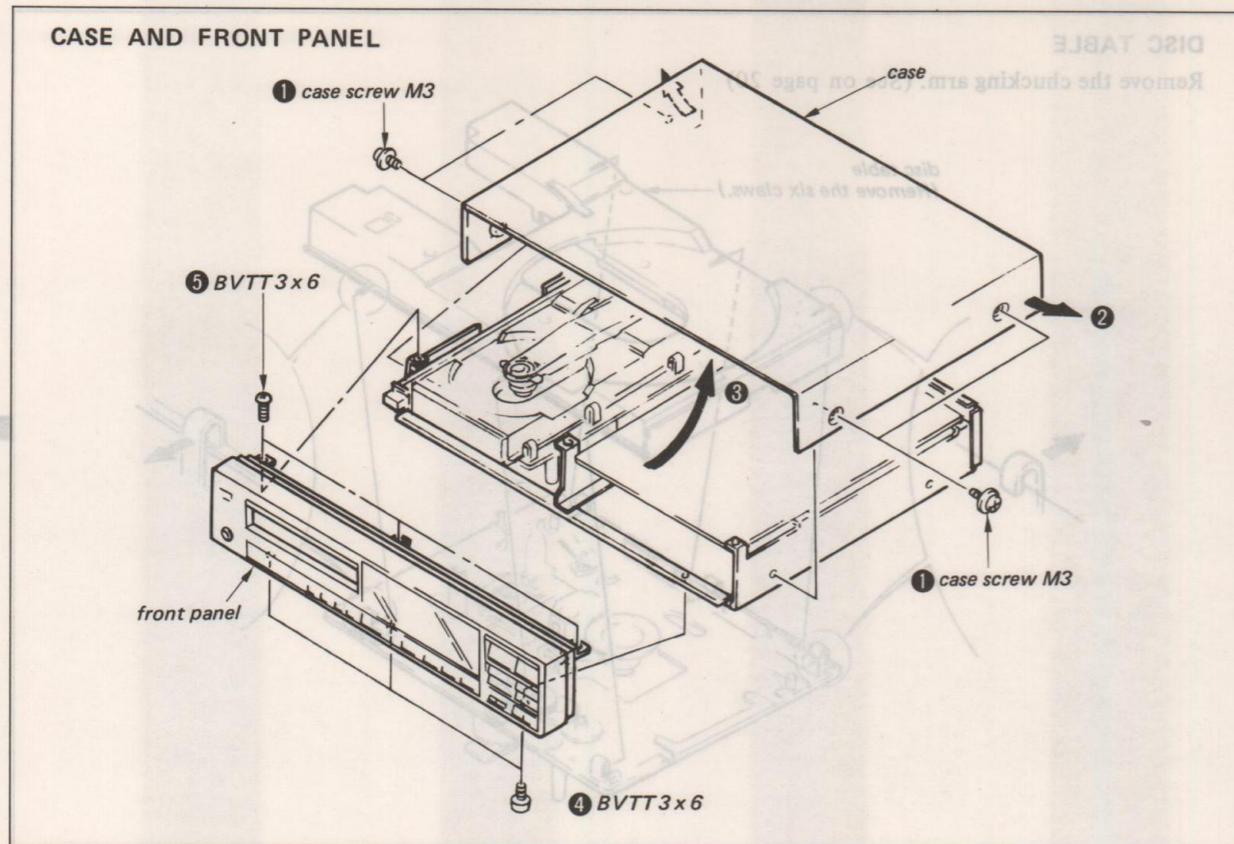

MEMO

SECTION 2 BLOCK DIAGRAM

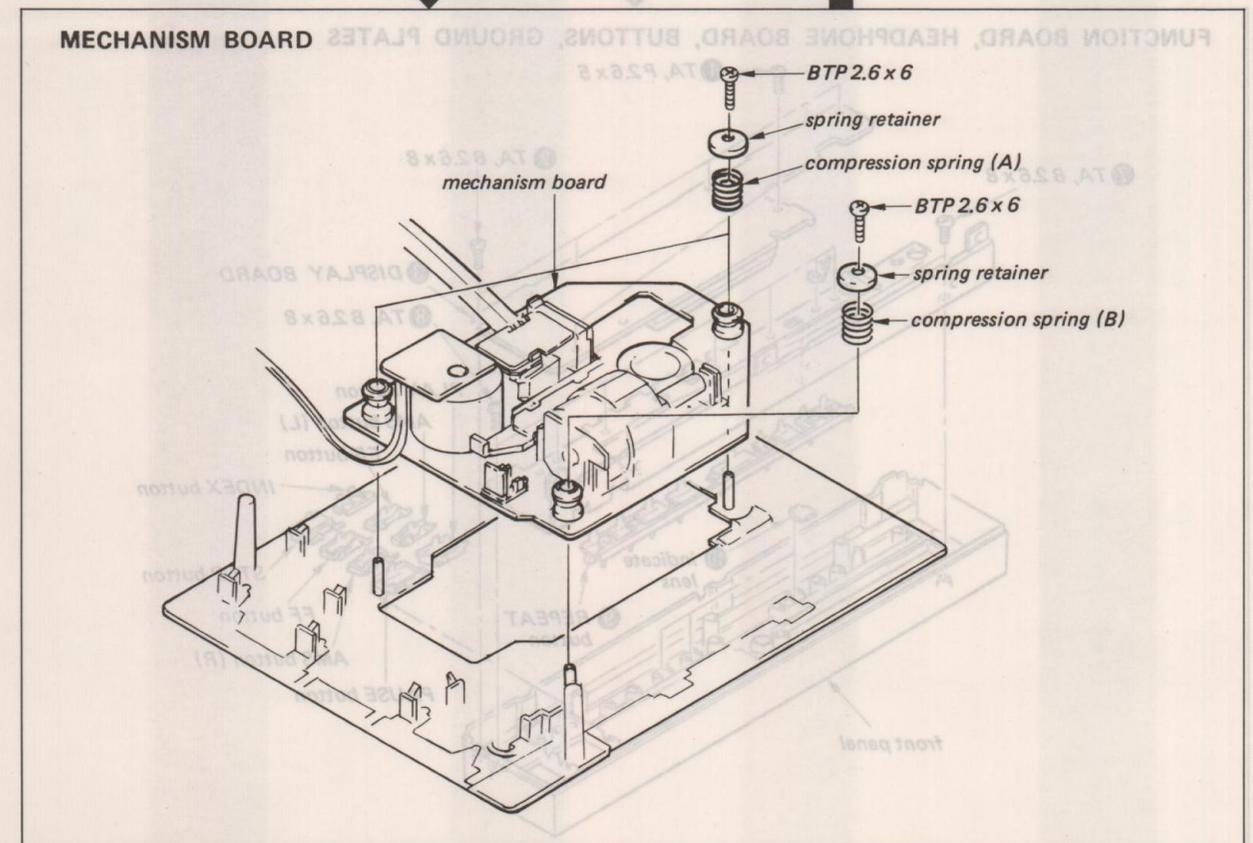

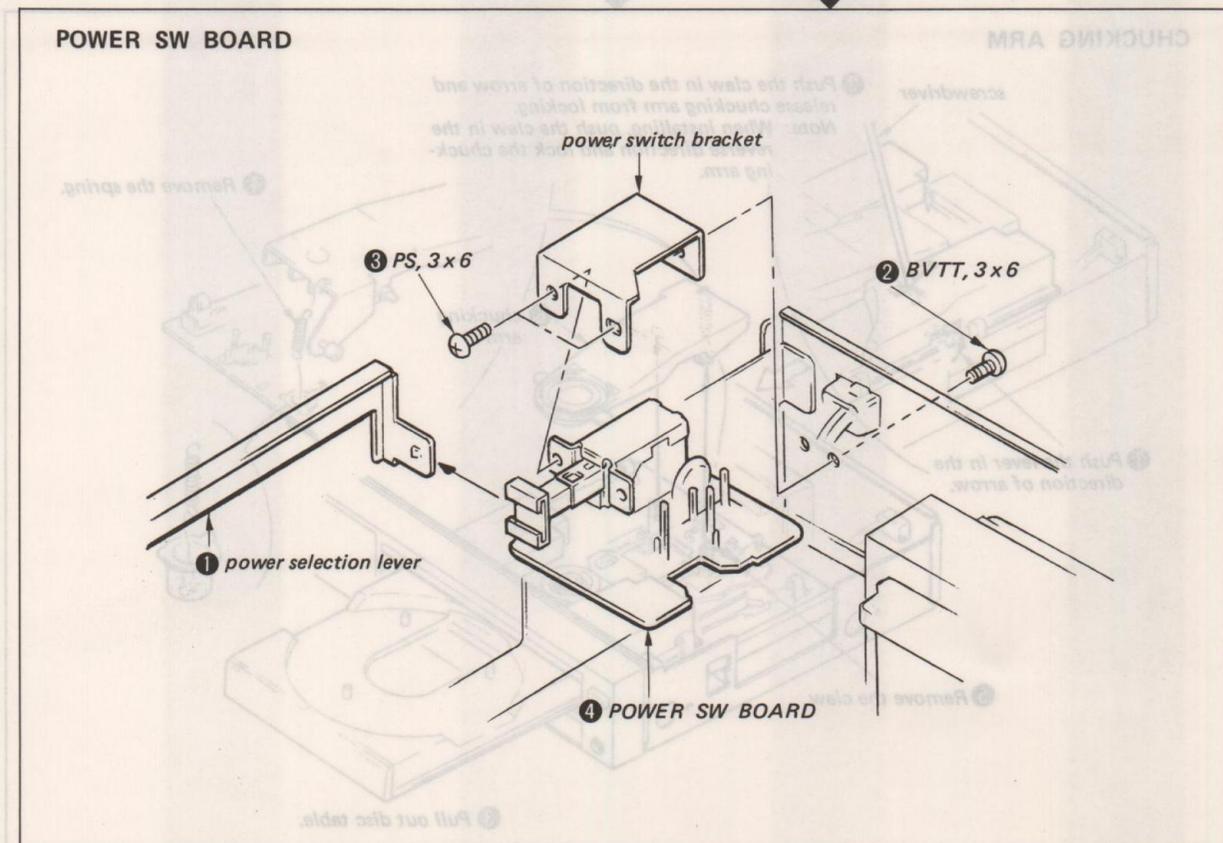

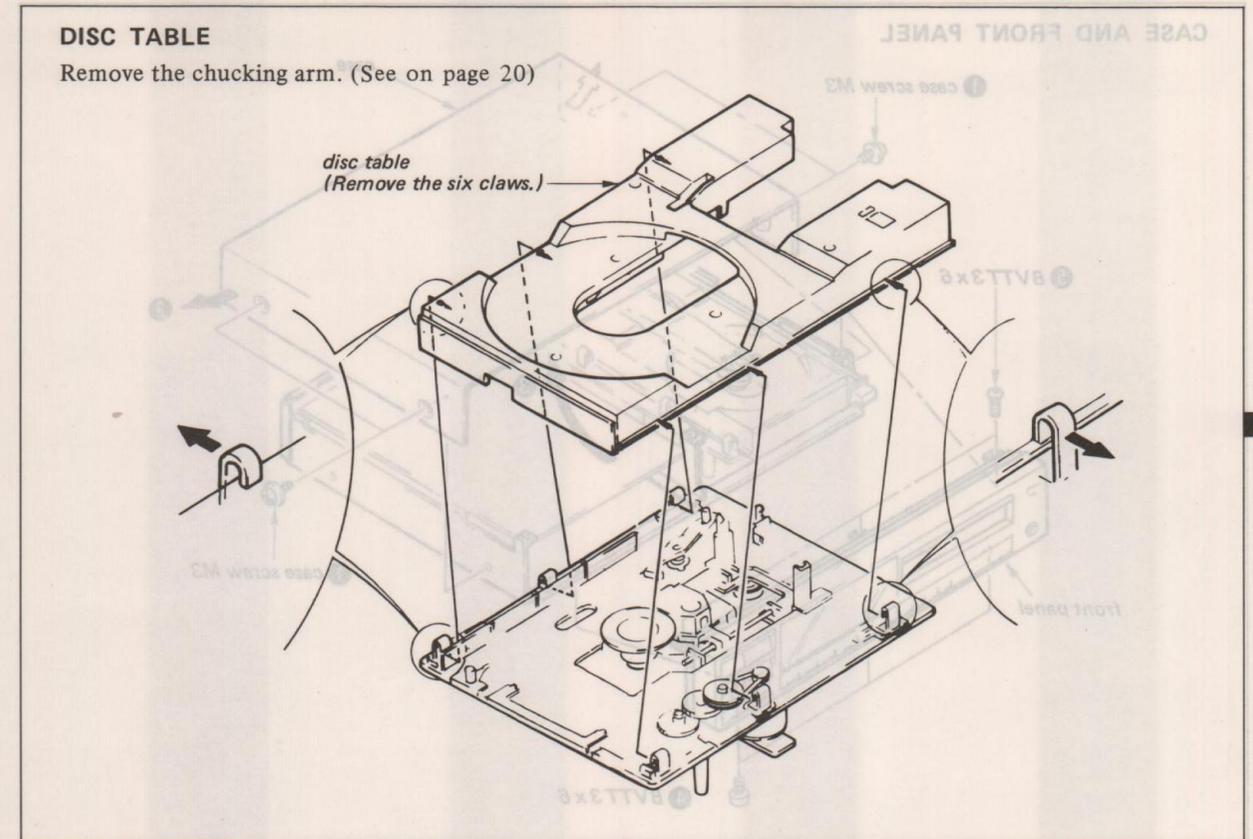

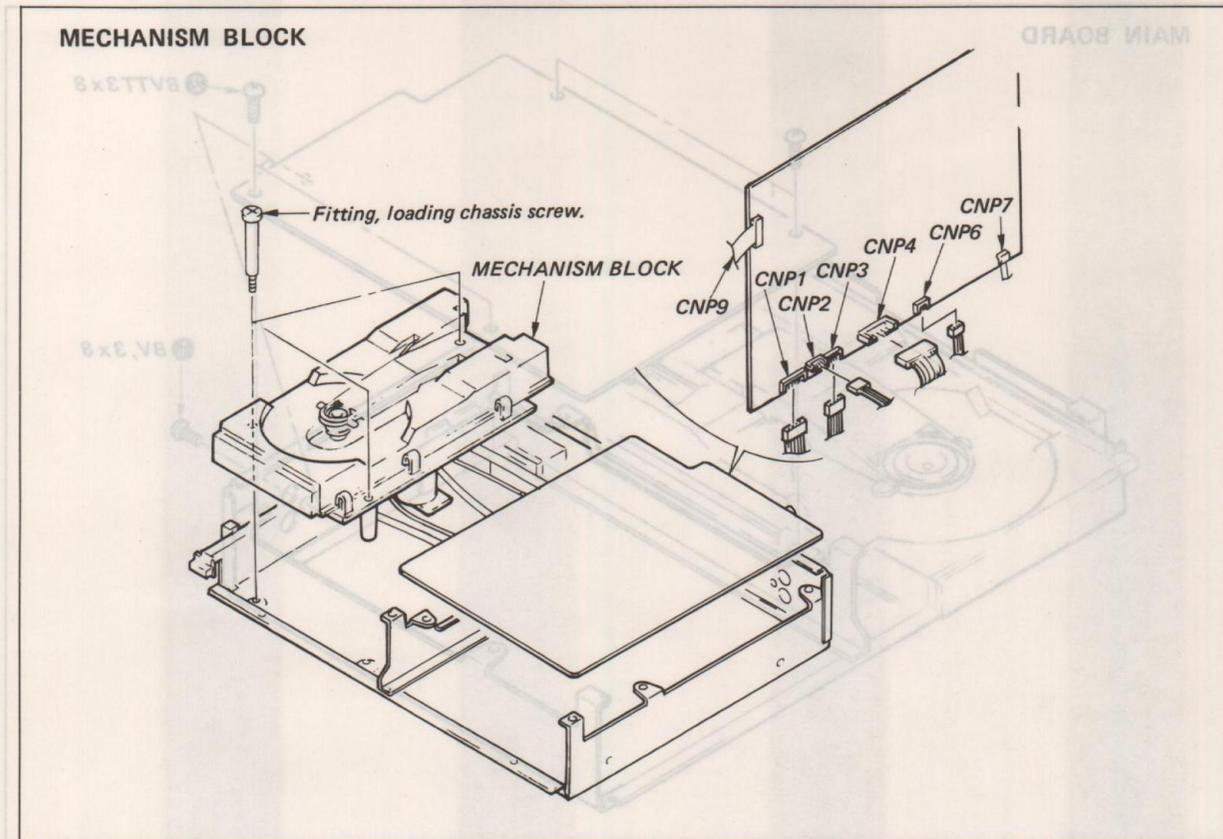

SECTION 3
DISASSEMBLY

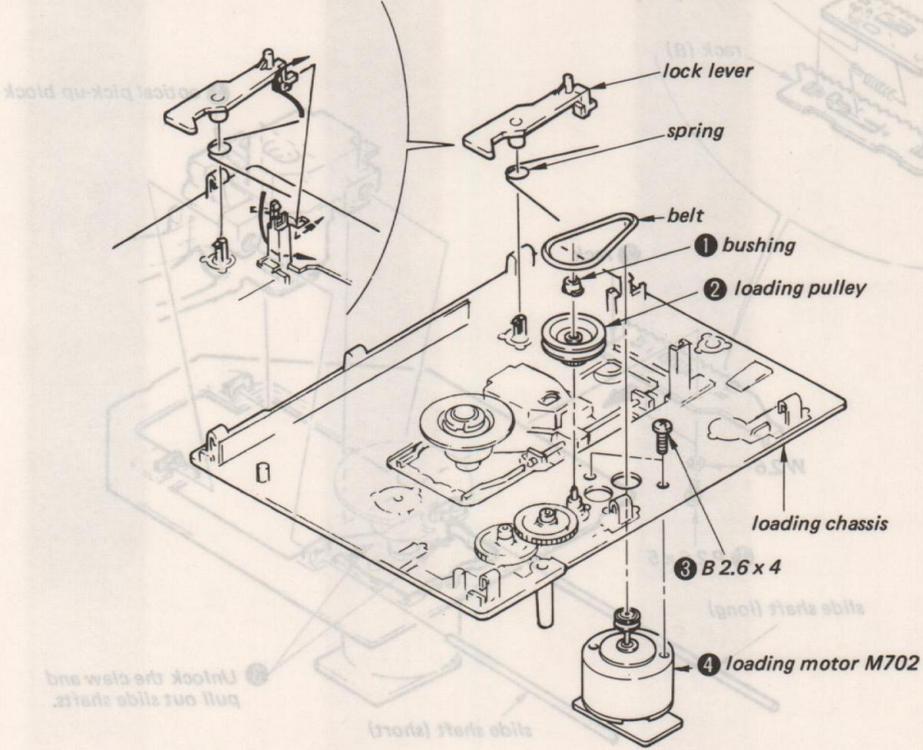

Note: Follow the disassembly procedure in the numerical order given.

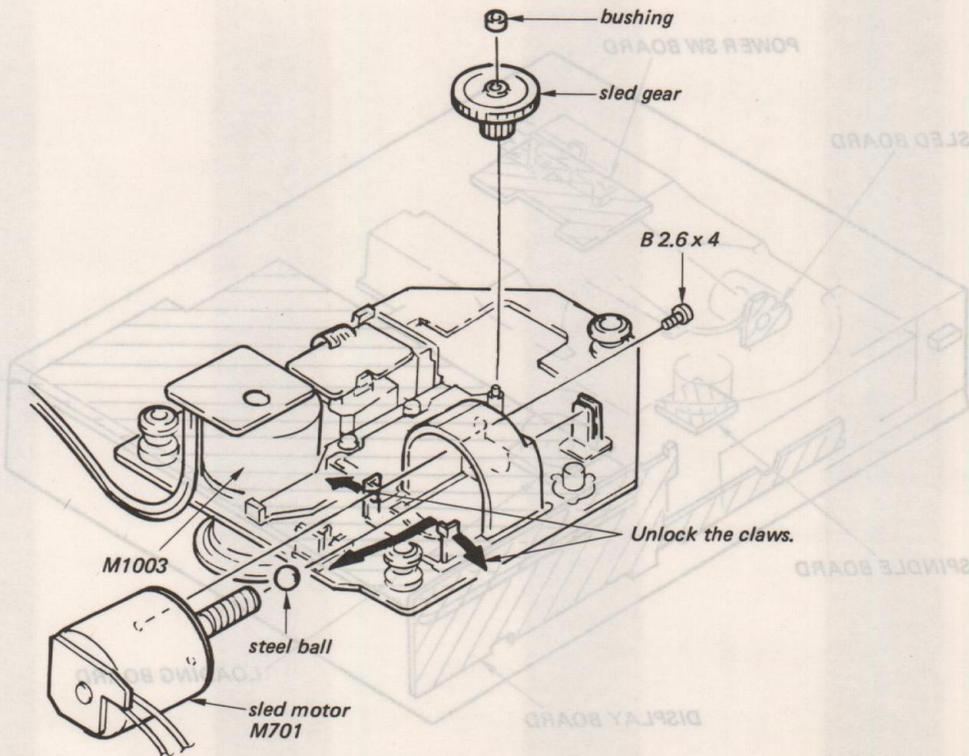

Note: Follow the disassembly procedure in the numerical order given.

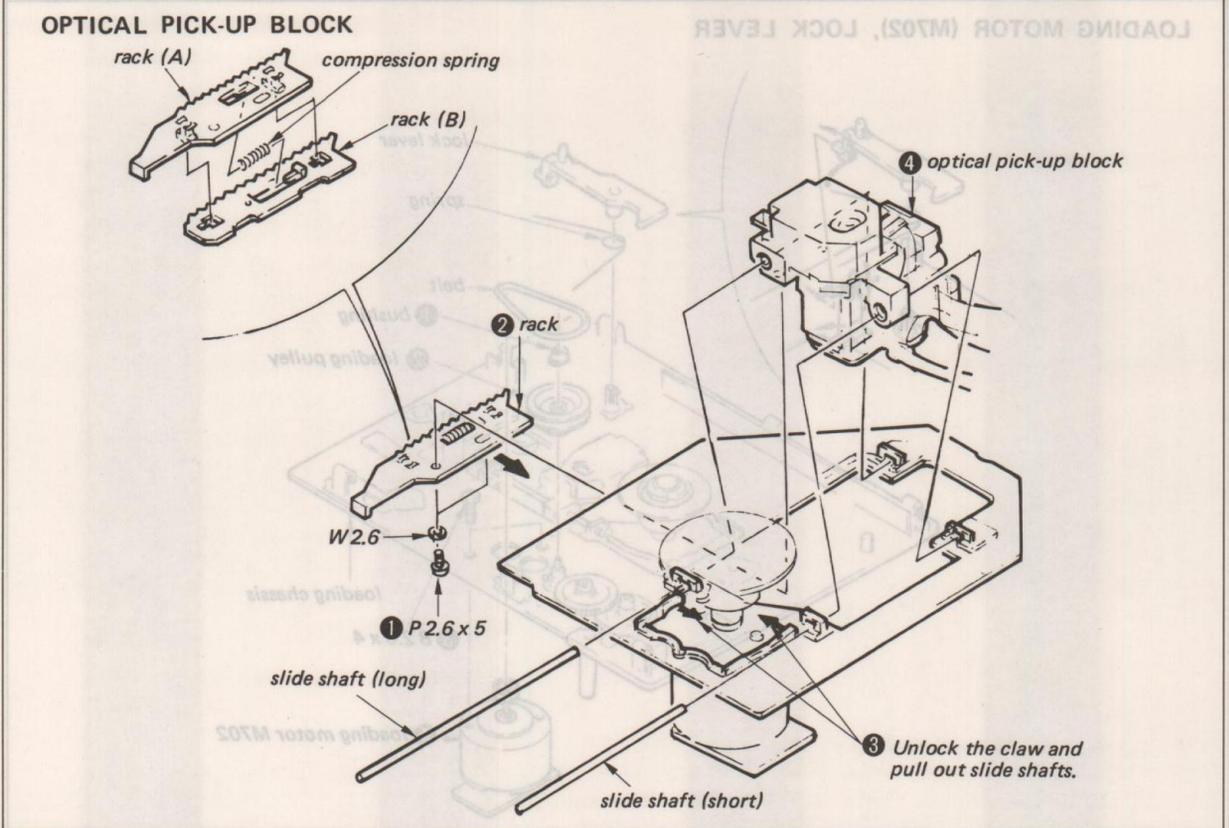

LOADING MOTOR (M702), LOCK LEVER

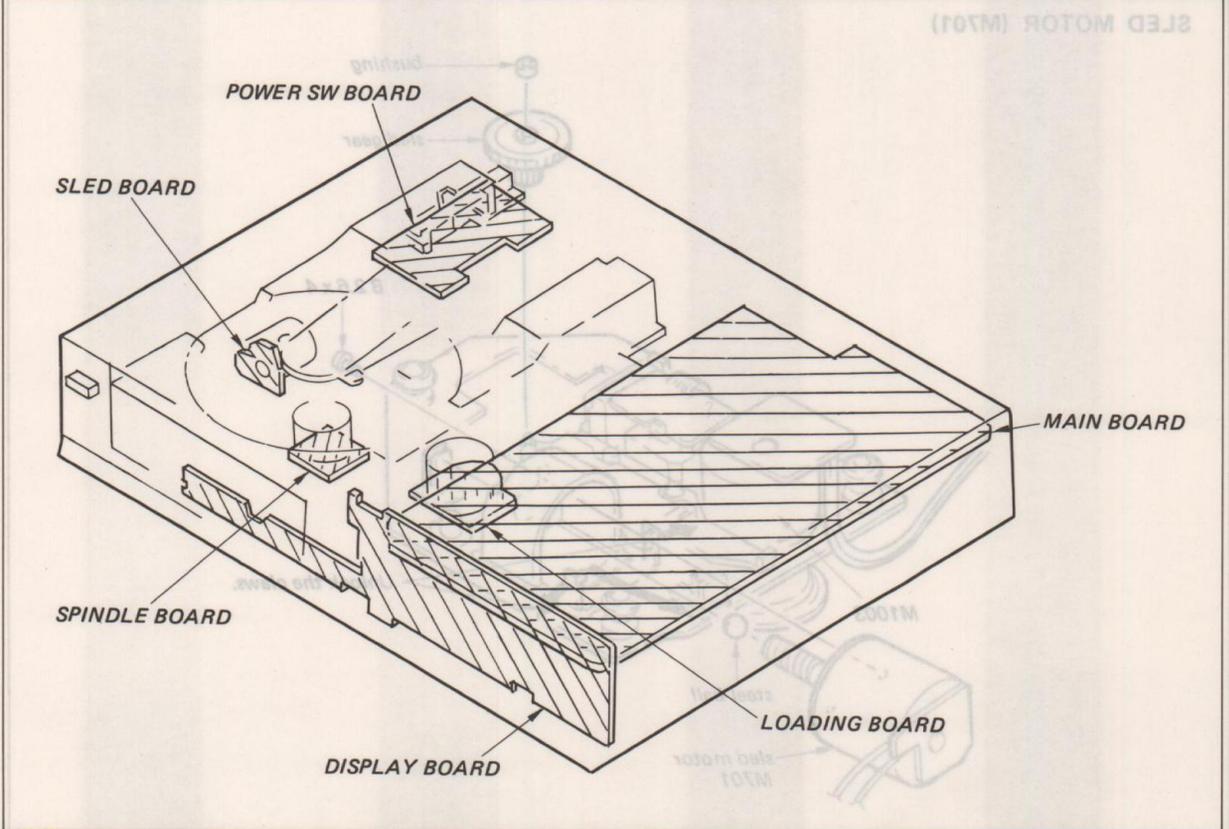

SLED MOTOR (M701)

CIRCUIT BOARD LAYOUT

SECTION 4 ADJUSTMENTS

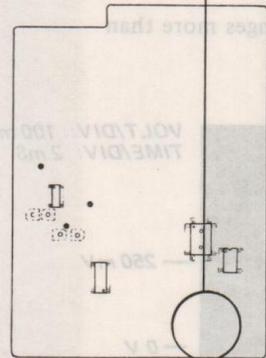

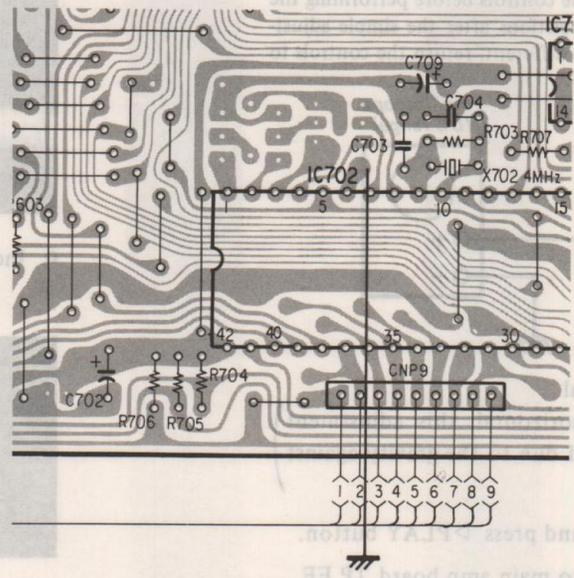

ELECTRICAL ADJUSTMENTS

1. Perform adjustments in the order given.
2. Use YEDS-1 disc unless otherwise indicated.
3. Use the oscilloscope with more than 10 MΩ impedance.

Adjustment Mode

Ground IC702 pin ⑥ on main board.

Adjustment Location: main board

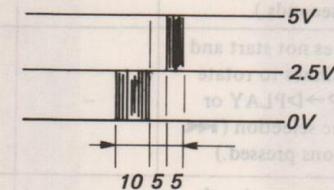

RF PLL FREE-RUN FREQUENCY CHECK

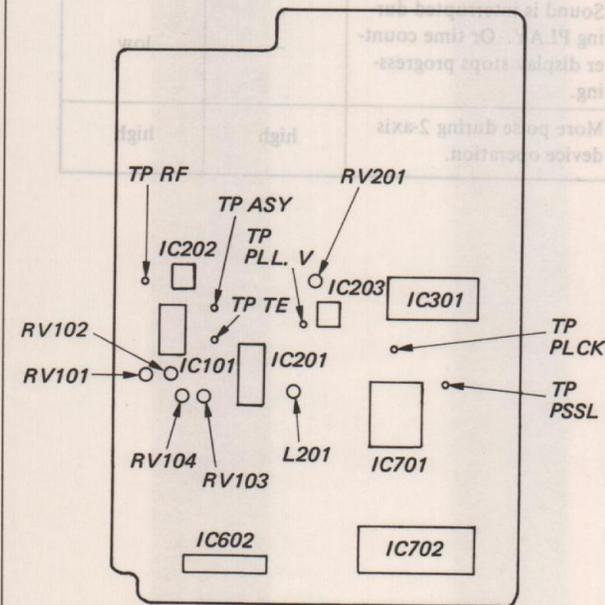

1. Ground both test points TP ASY and TP PSSL (pins 58 and 59 of IC701).
2. Press OPEN/CLOSE button and open the disk holder.
3. Adjust RV201 for a $0 \pm 0.05V$ dc at test point TP PLLV.
4. Check for 4.3218 MHz at test point TP PLCK using a frequency counter. If not, adjust L201.

CLV WAVEFORM CHECK

Check at test point TP CLV.

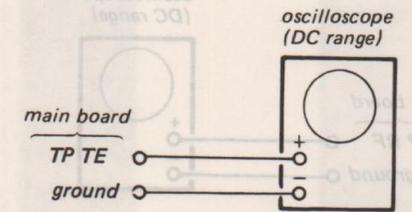

Adjustment Location: main board

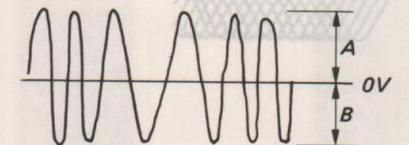

TRAVERSE ADJUSTMENT

This adjustment should be made when replacing TOP (T-type Optical Pick-up).

Procedure:

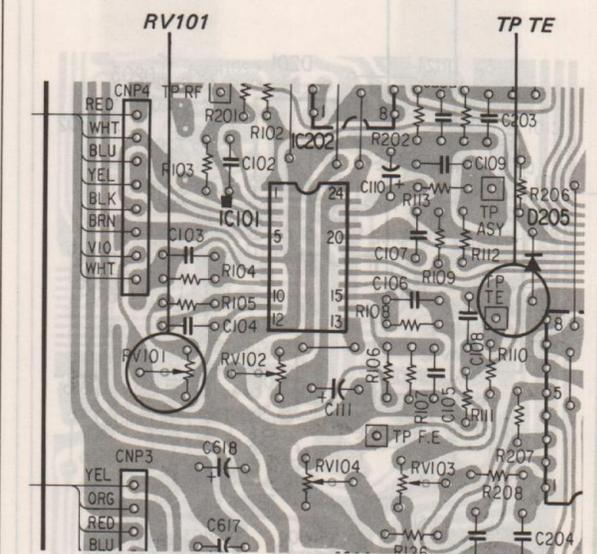

1. Connect oscilloscope to test point TP TE and ground.
2. Put set into adjustment mode. (See page 25.)
3. Turn POWER switch on.
4. Put disc (YEDS-1) in and press ▷ button.
5. Set RV103 to counterclockwise stop.
6. Adjust RV101 for a vertically-symmetrical waveform as shown below. (A=B).
7. After adjustment, cancel the adjustment mode. (See page 25.)

VOLT/DIV: 1 V
TIME/DIV: 1 ms

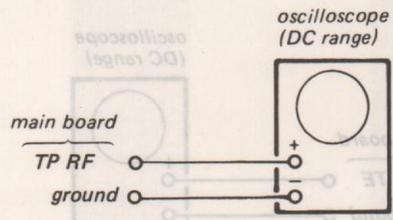

Adjustment Location: main board

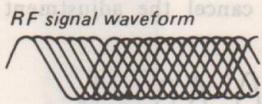

Focus Bias Adjustment

This adjustment should be made when replacing TOP (T-type Optical Pick-up):

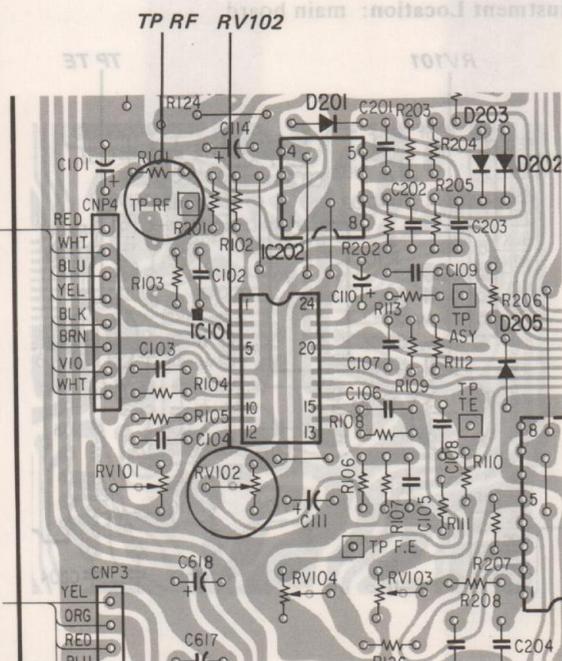

Procedure:

1. Connect oscilloscope to test points TP RF and ground.
2. Put set into adjustment mode. (See page 25.)
3. Turn POWER switch on.
4. Put disc (YEDS-1) in and press ▷ button.
5. Adjust RV102 for an optimum waveform eye pattern or so that the peak is maximum. Optimum eye pattern means that shape “◇” can be clearly distinguished at the center of the waveform.

Adjustment Location: main board

REFERENCE

Focus/Tracking Gain Adjustment

A frequency response analyzer is necessary in order to perform this adjustment exactly. However, this gain has a margin, so even if it is slightly off, there is no problem. Therefore, do not perform this adjustment.

Focus/tracking gain determines the pick-up follow-up (vertical and horizontal) relative to mechanical noise and mechanical shock when the 2-axis device operate.

However, as these reciprocate, the adjustment is at the point where both are satisfied.

- When gain is raised, the noise when the 2-axis device operates increases.
- When gain is lowered, it is more susceptible to mechanical shock and skipping occurs more easily.
- When gain adjustment is off, the symptoms below appear.

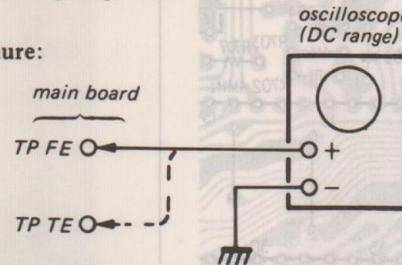

Symptoms	Gain	Focus	Tracking
• The time until music starts becomes longer for STOP →▷PLAY or automatic selection (◀▶ buttons pressed. (Normally takes about 2 seconds.)		low	low or high
• Music does not start and disc continues to rotate for STOP →▷PLAY or automatic selection (◀▶ buttons pressed.)		—	low
• Disc table opens shortly after STOP →▷PLAY.		low or high	—
• Sound is interrupted during PLAY. Or time counter display stops progressing.		—	low
• More poise during 2-axis device operation.		high	high

The following is a simple adjustment method.

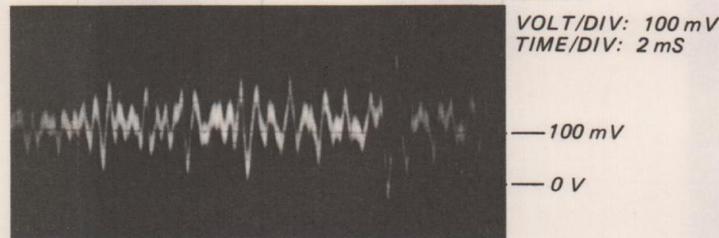

— Simple Adjustment —

Note: Since exact adjustment cannot be performed, remember the positions of the controls before performing the adjustment. If the positions after the simple adjustment are only a little different, return the controls to the original position.

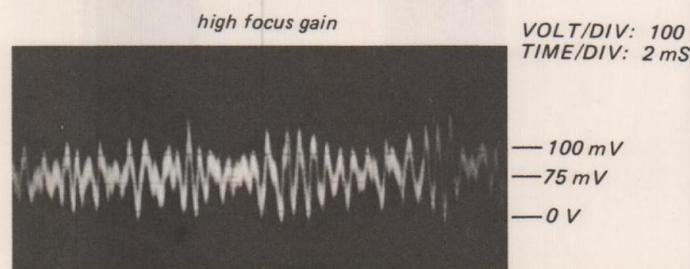

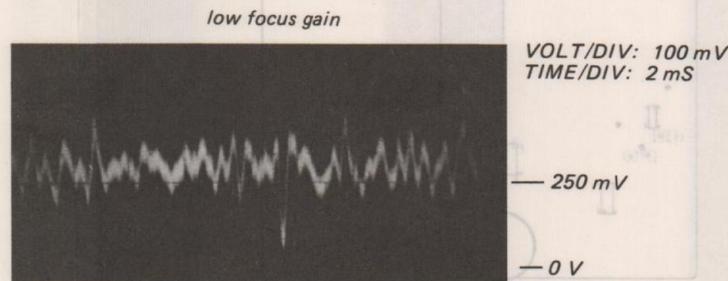

Procedure:

1. Keep the set horizontal. (If the set is not horizontal, this adjustment cannot be performed due to the gravity against the 2 axis device.)
2. Insert disc (YEDS-1) and press ▷PLAY button.
3. Connect oscilloscope to main amp board TP FE.
4. Adjustment RV104 so that the waveform is as shown in the figure below. (focus gain adjustment)

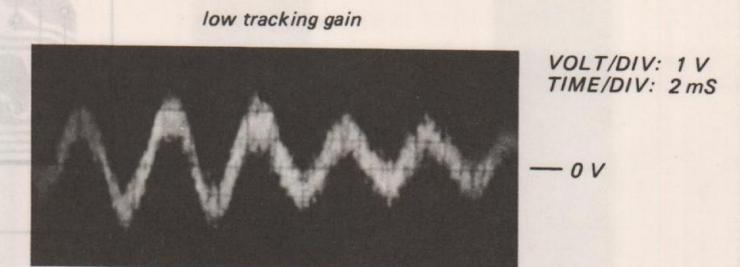

- Inconrrent Examples (DC level changes more than on adjusted waveform)

5. Connect oscilloscope to main board TP TE.
6. Adjust RV103 so that the waveform is as shown in the figure below. (tracking gain adjustment)

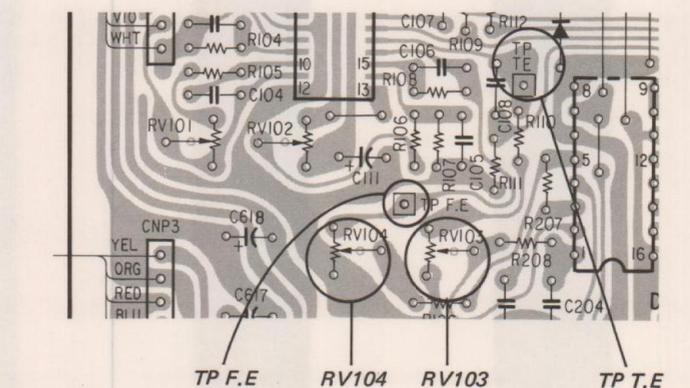

- Inconrrent Examples (fundamental wave appears)

- high tracking gain (higher fundamental wave than for low gain)

Adjustment Location: main board

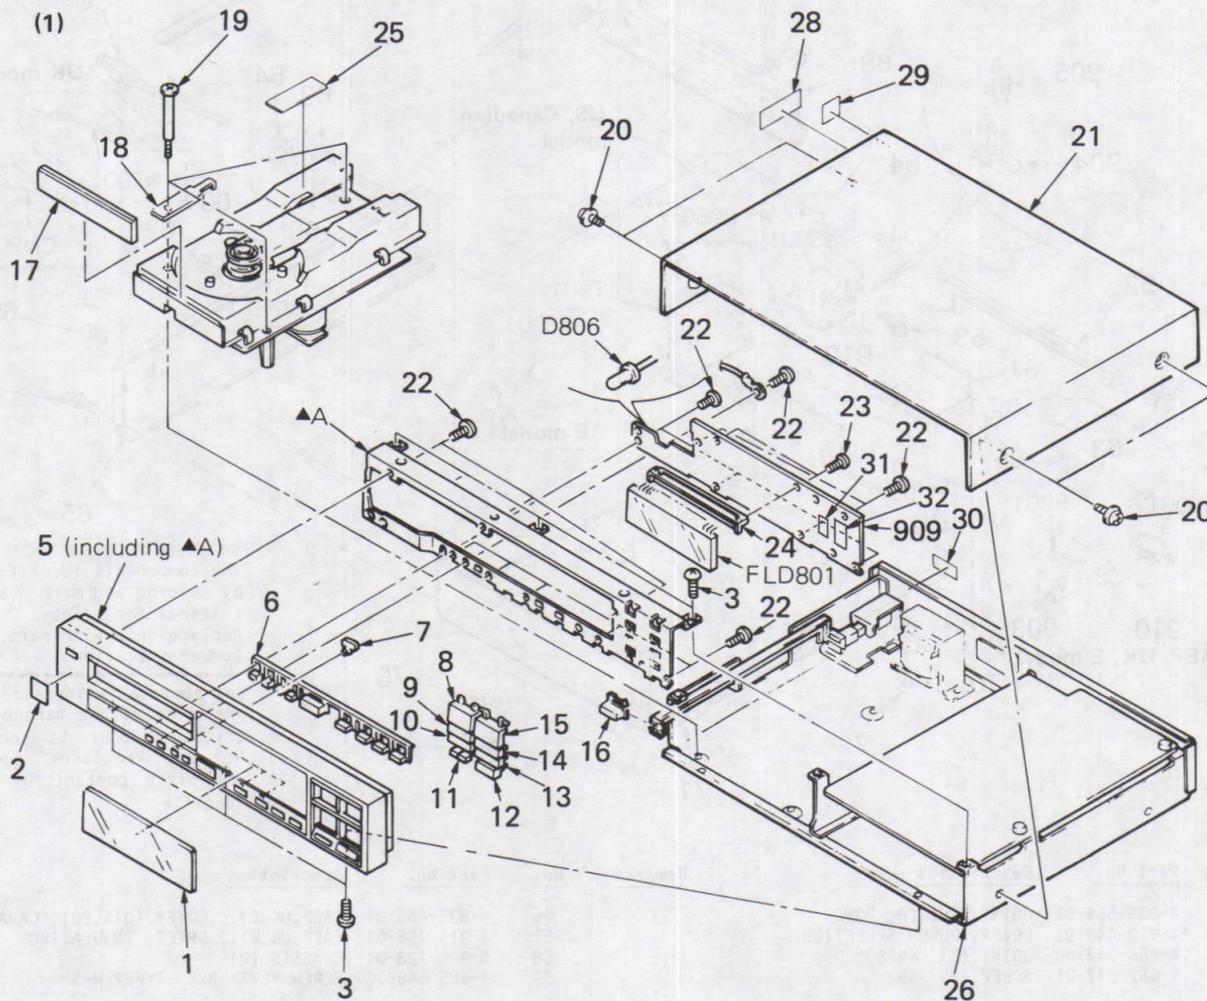

SECTION 5 EXPLODED VIEWS AND PARTS LIST

NOTE:

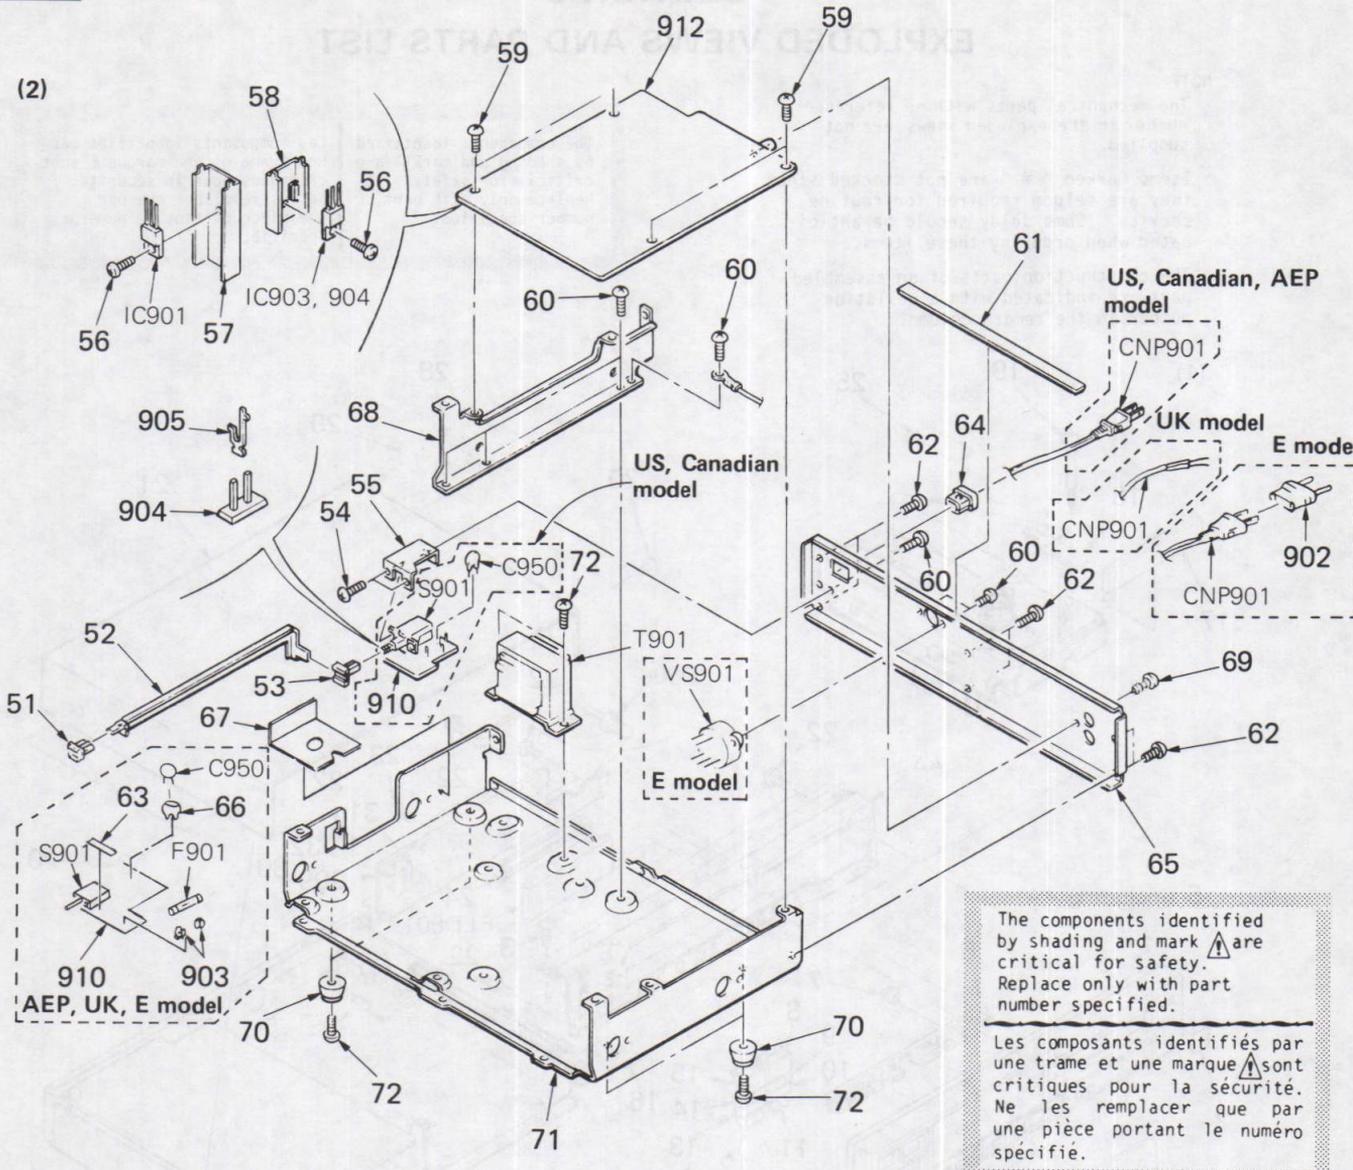

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The construction parts of an assembled part are indicated with a collation number in the remark column.

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

SECTION 6

ELECTRICAL PARTS LIST

NOTE

- Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS:

MF:μF, PF:μμF.

RESISTORS

- All resistors are in ohms.
- F : nonflammable

COILS

• MMH : mH, UH : μH

SEMICONDUCTORS

In each case, U : μ, for example:

 UA...: μA..., UPA...: μPA..., UPC...: μPC,
 UPD...: μPD...

The components identified by shading and mark are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

ACCESSORY & PACKING MATERIAL

Part No.	Description
1-558-543-11	CORD, CONNECTION
2-370-716-01	(US,AEP,UK,Canadian)..SHEET, PROTECTION
3-536-080-11	(E)....BAG, POLYETHYLENE
3-701-630-00	BAG, POLYETHYLENE
3-703-390-01	INSTRUCTION
3-703-834-01	LABEL, DISTRIBUTION
3-765-129-11	(AEP,UK,E)...MANUAL, INSTRUCTION
3-765-129-21	(US,Canadian)MANUAL, INSTRUCTION
3-765-129-31	(Canadian)...MANUAL, INSTRUCTION
3-765-129-41	(AEP).....MANUAL, INSTRUCTION
3-795-629-11	(AEP).....INSTRUCTION
4-913-749-12	(Canadian)...INDIVIDUAL CARTON
4-913-749-21	(US).....INDIVIDUAL CARTON
4-913-749-41	(AEP,UK,E)...INDIVIDUAL CARTON
4-913-750-01	CUSHION

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

SCHEMATIC DIAGRAM

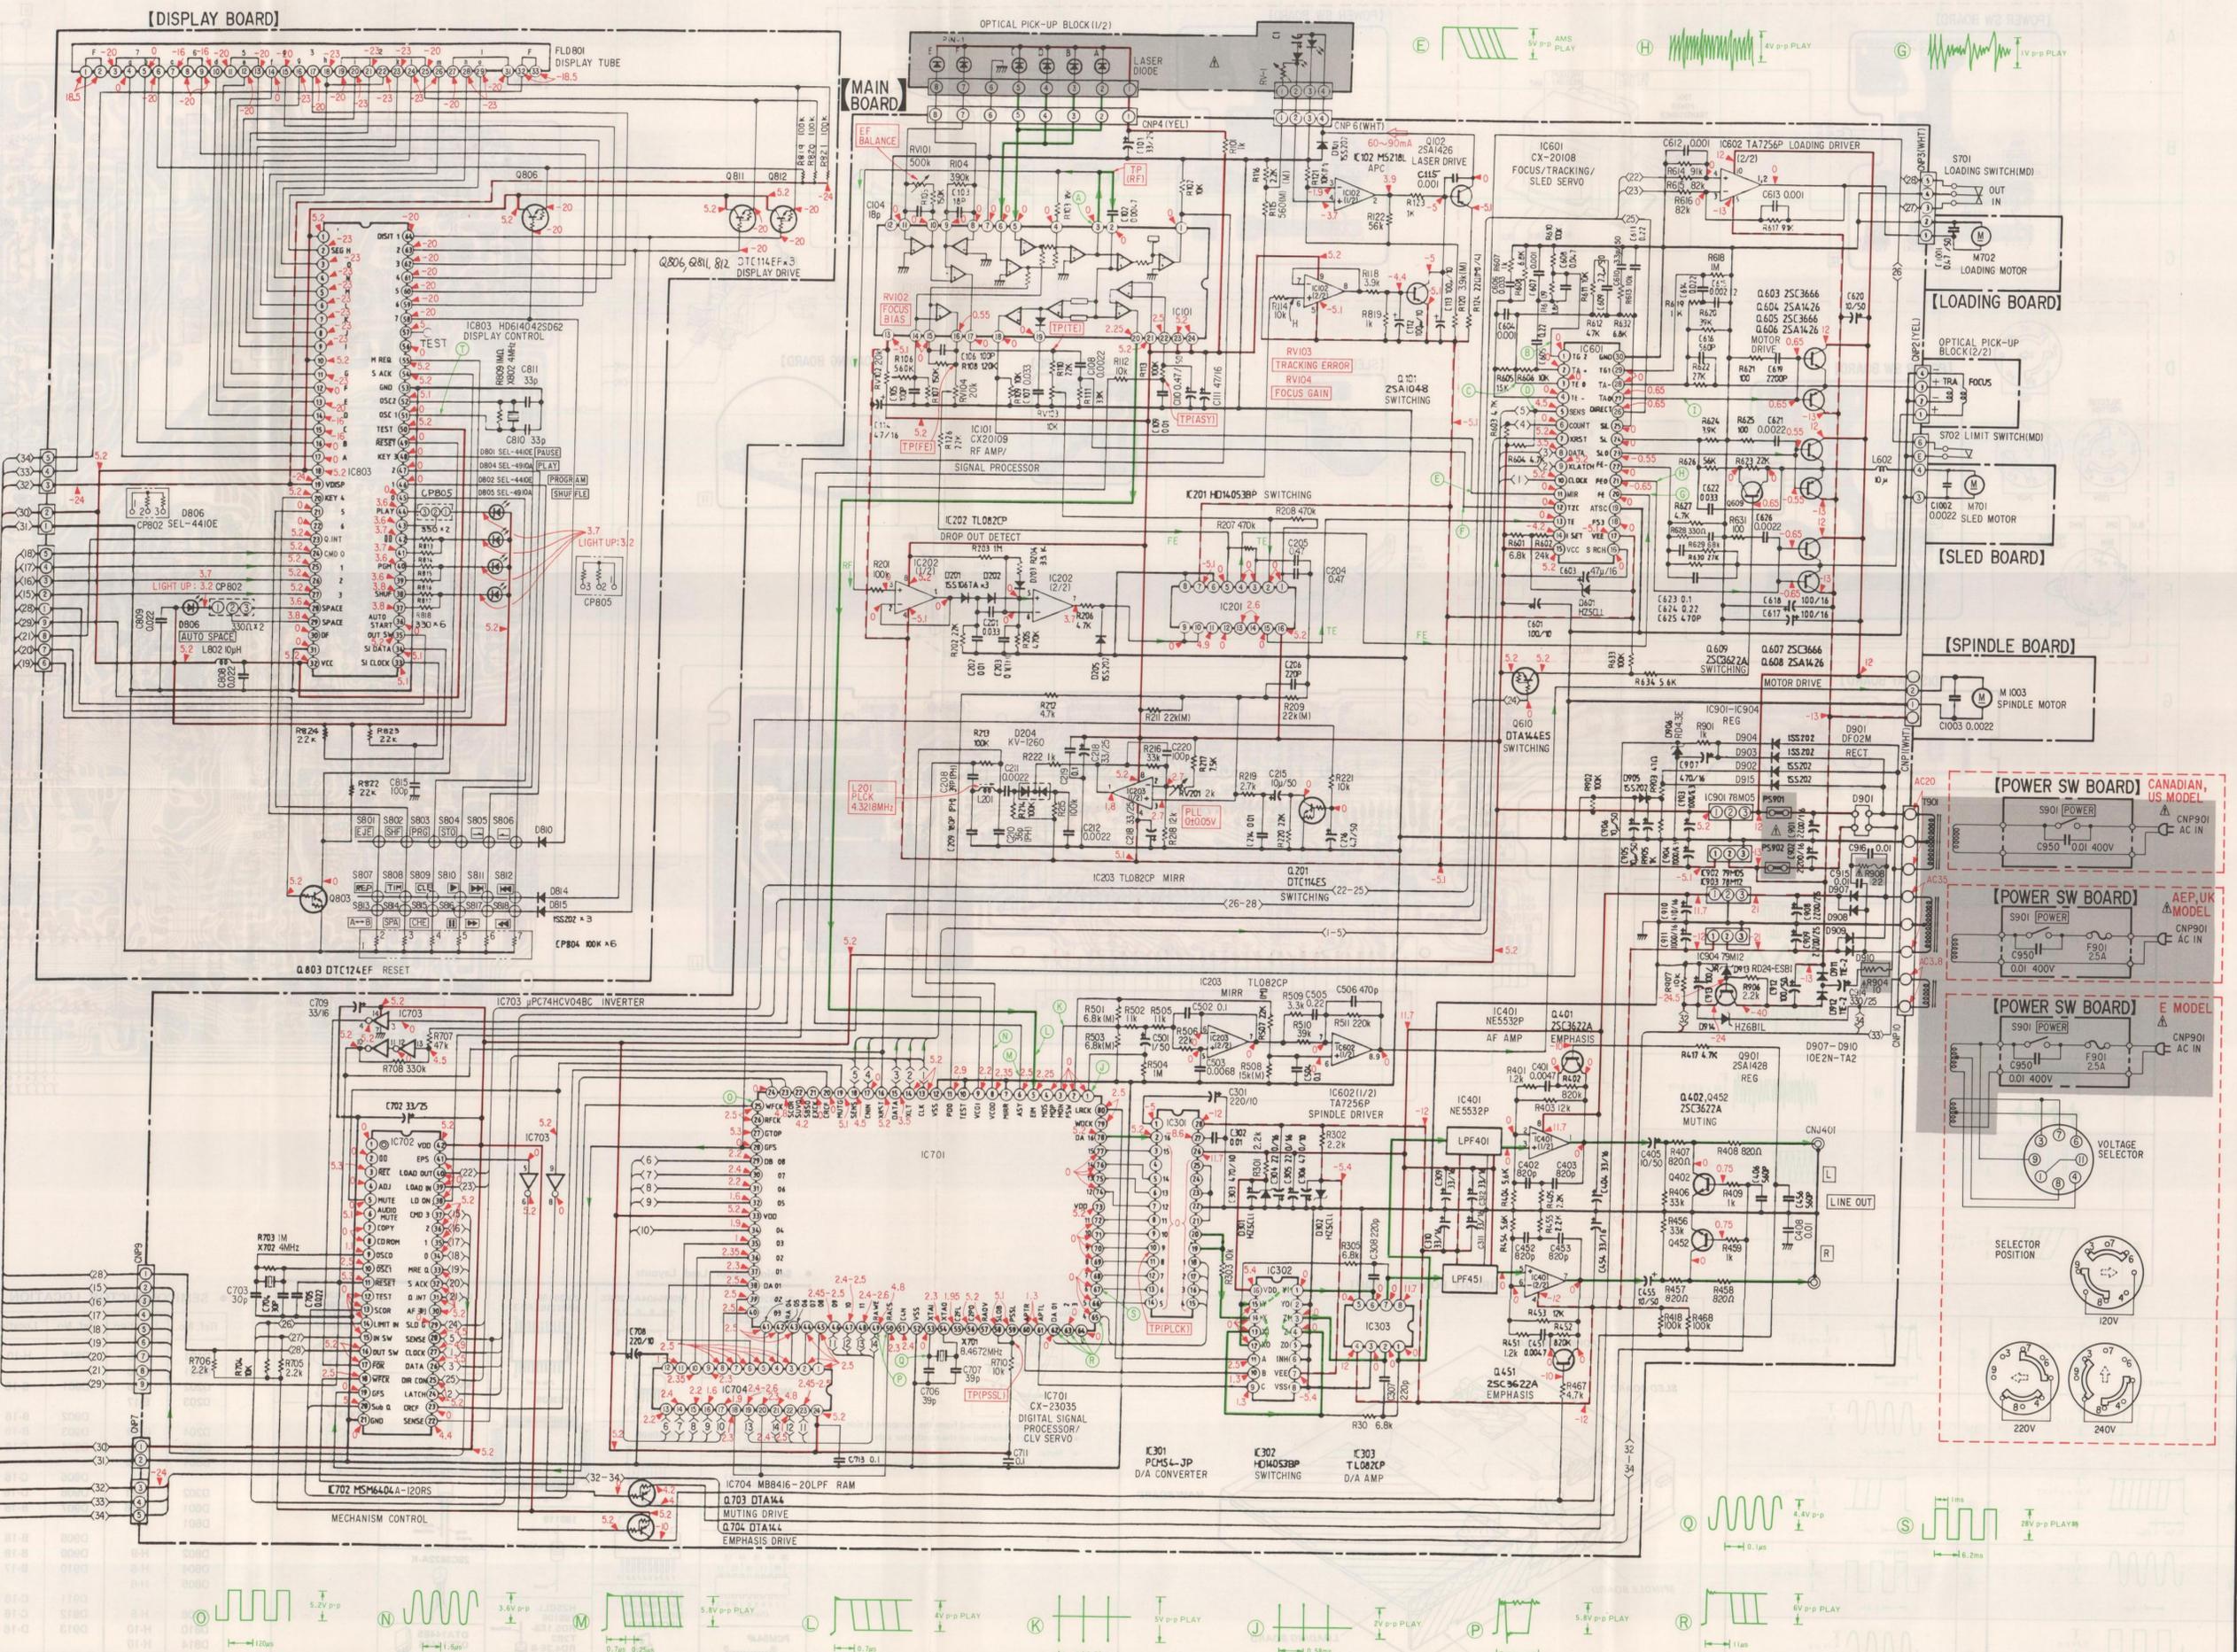

Note: The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

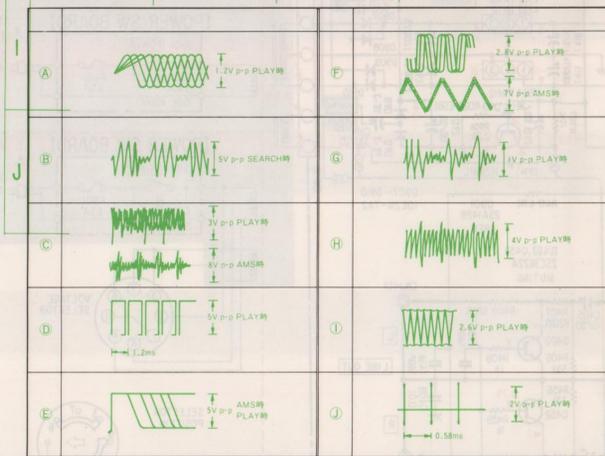

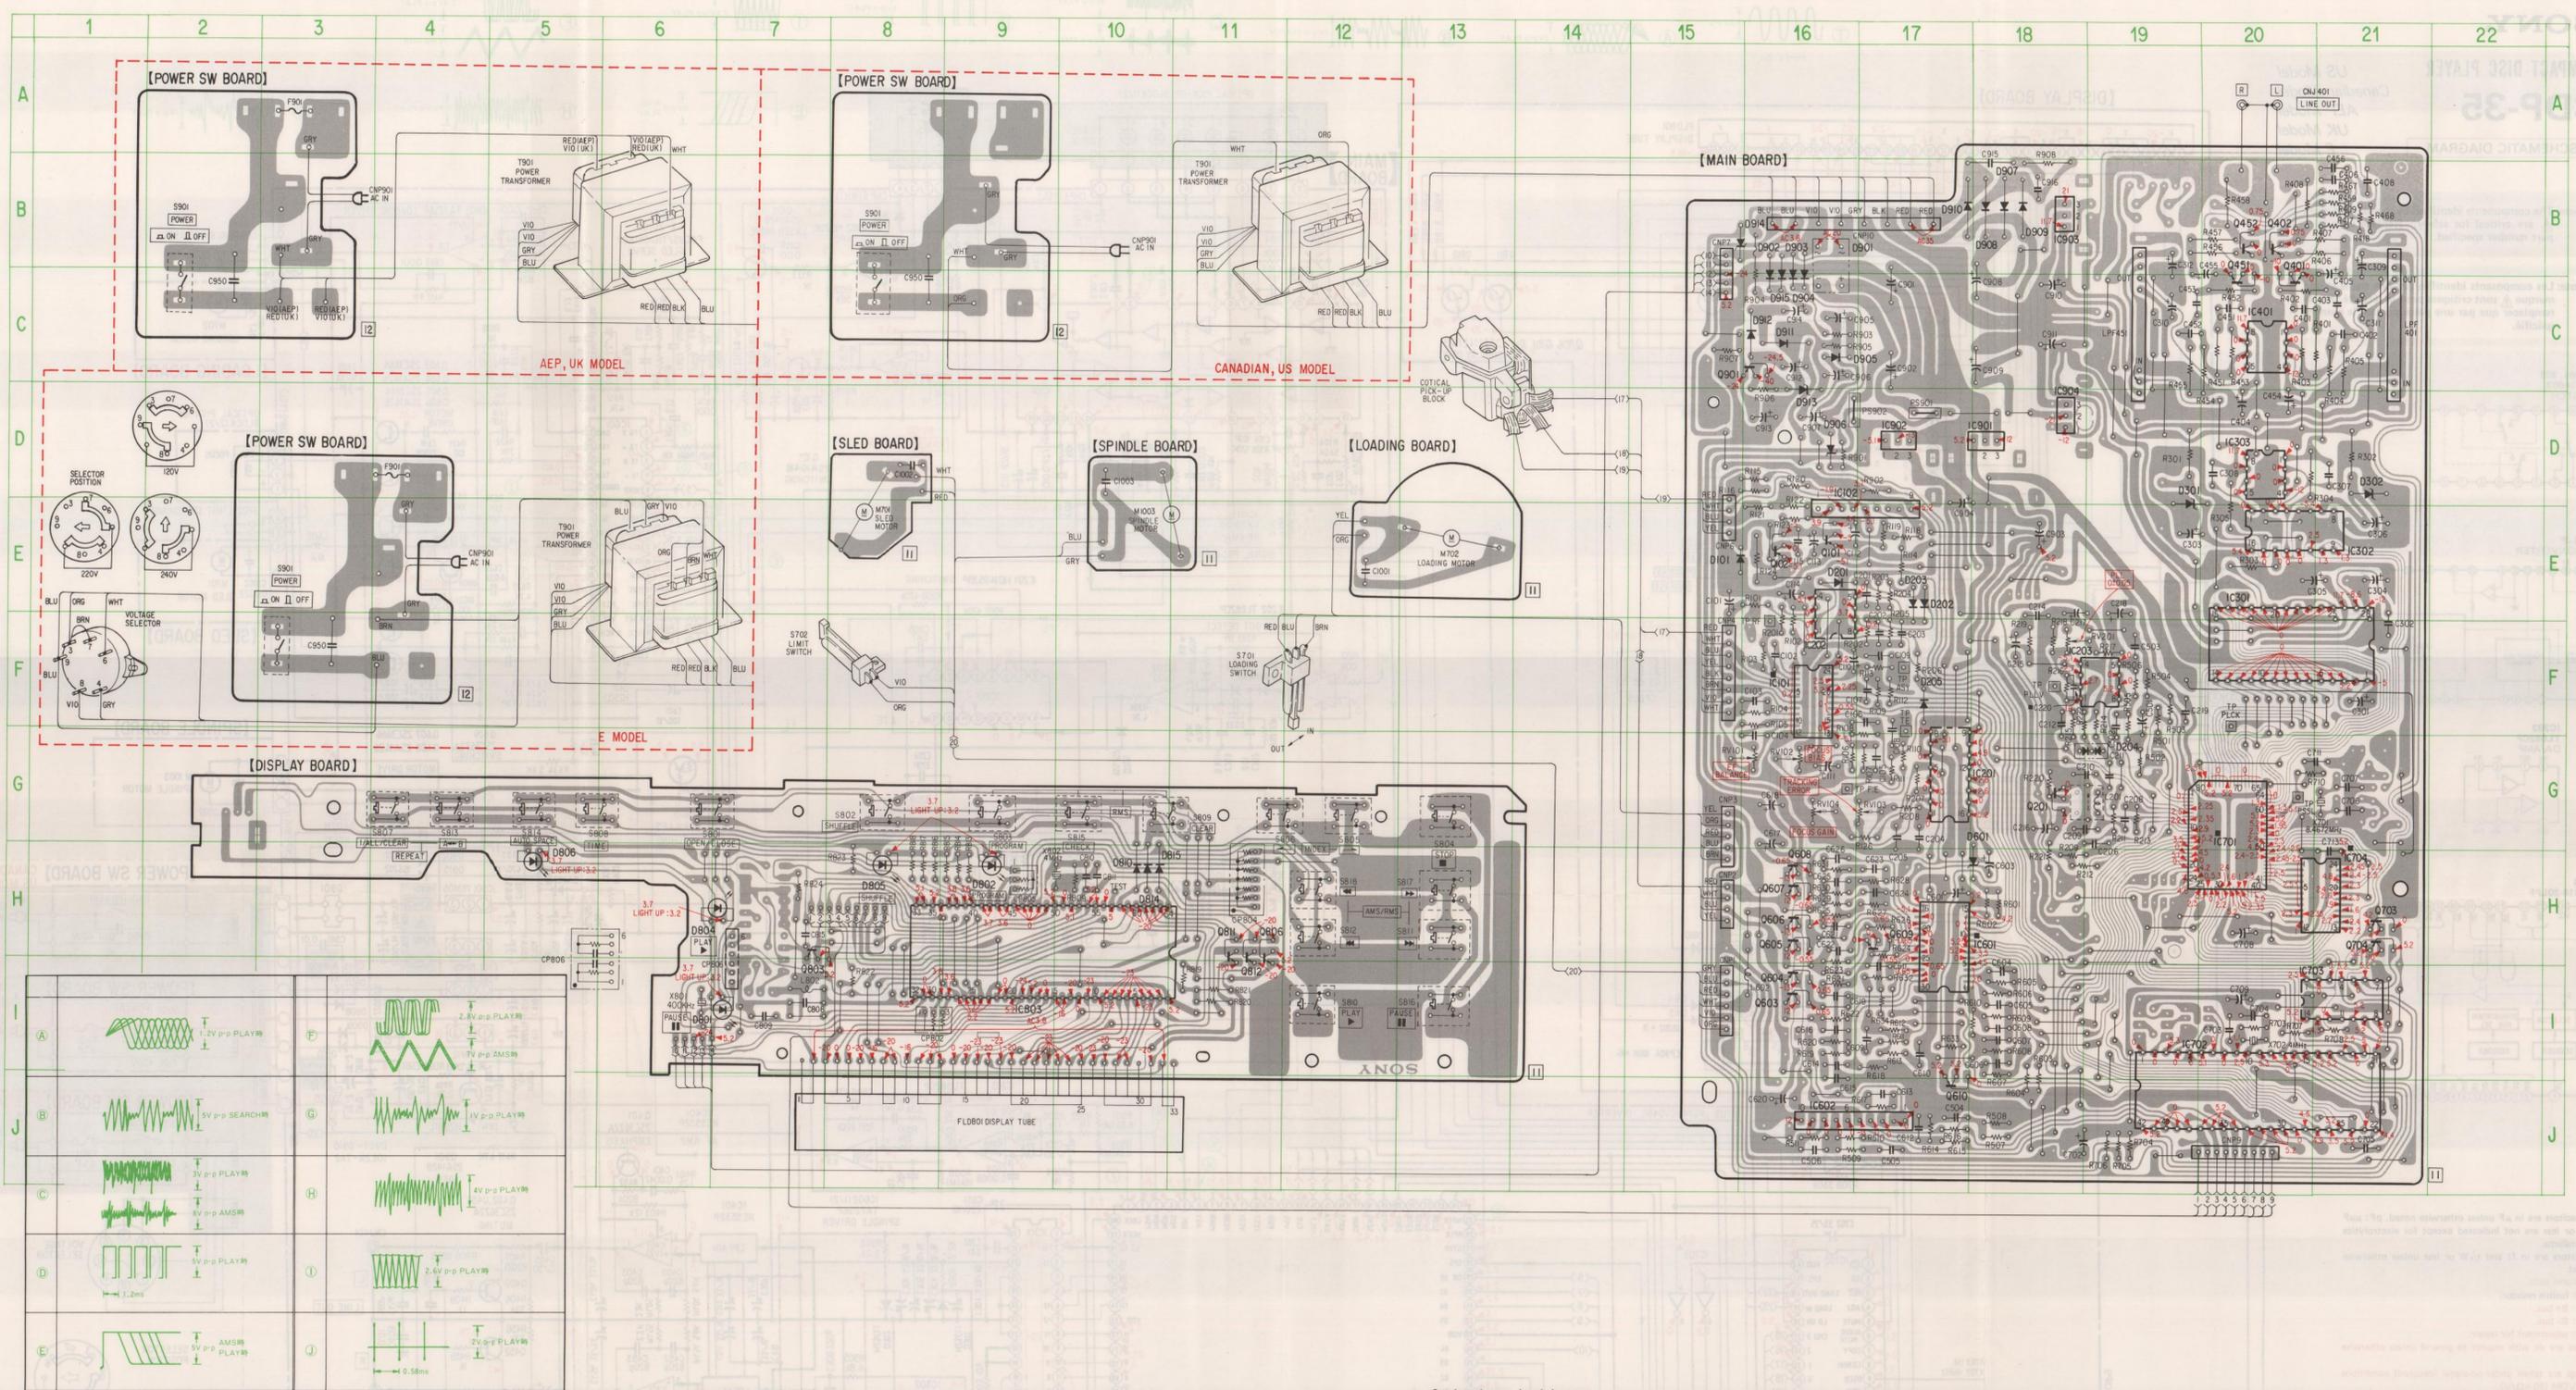

Note: Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

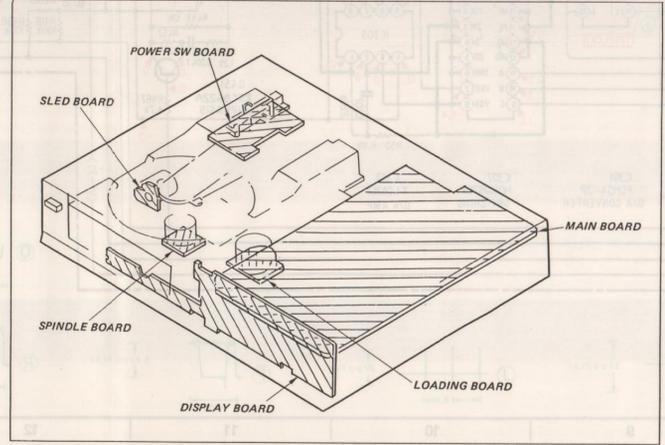

- Note:
- All capacitors are in μF unless otherwise noted. pF: μF 50WV or less are not indicated except for electrolytics and tantalums.
 - All resistors are in Ω and $1/4\text{W}$ or less unless otherwise specified.
 - Signal path.
 - Fusible resistor.
 - B+ bus.
 - B- bus.
 - Adjustment for repair.
 - Voltagess are dc with respect to ground unless otherwise noted.
 - Readings are taken under no-signal (detuned) conditions with a VOM (50 $\text{k}\Omega/\text{V}$).
 - Voltage variations may be noted due to normal production tolerances.
 - Notes: Δ : Circled T.P. No's coincide with those in mounting and schematic diagrams.
 - Waveforms are taken to ground by using oscilloscope.
 - Switches

Ref. No.	Switch	Position
